Home/Cell: 552-7488

E-mail: simonton@marshall.edu

Required Textbook: LaGrega et al., *Hazardous Waste Management, 2nd Edition*
McGraw-Hill, Inc.

Additional References and Reading Assignments:

Vista.marshall.edu

Course Description:

Hazardous waste management will cover an assortment of topics involved in the handling, storage, treatment, and disposal of hazardous waste.

Attendance:

As tests and assignments will include information from class notes and in-class discussions, and because some reference material will be handouts and notes, attendance is strongly encouraged. I will provide handouts and homework assignments if you miss class, but you will need to get notes from fellow students.

| | | |
|-----------------|-------------------------------|-----|
| Grading: | Mid-Term Exams (2, Take Home) | 50% |
| | Final Exam (Take Home) | 30% |
| | Assignments | 20% |

Students are expected to read the assigned material and to participate in class discussions. Homework/Exams are to be completed in a professional manner and submitted within the assigned deadline. Certain material assigned as required reading may not be covered within the planned lecture. It is the students' option to ask a question on the material or to initiate a class discussion on the material not explicitly discussed in the lecture.

Assignments not turned in on time will receive an automatic 25% off. Assignment grades will be based on completeness only, and will be returned with a solution set. You are encouraged to work together on assignments, but not exams! The Final Exam will be comprehensive.
