

8/9/2007

It is very easy to access your v-drive (virtual drive) from off-campus.

All you need is an internet connection and Internet Explorer.

FTP - stands for file transfer protocol. It is a standard method used to move file across the internet.

Just follow these easy steps from off-campus:

1. Use Internet Explorer to connect to this site:
<ftp://users.marshall.edu>
2. A pop-up login window will open
3. Your User Name is marshall\username , ie. marshall\smith12
(Be sure to use the \ back slash, not the forward / slash).
Your Password is the one you use to login to your computer on campus
4. Your V: drive folder list appears
