VPN—connecting to the Marshall network from off-campus

VPN stands for Virtual Private Networking. This is a means to provide you with a very secure connection from anywhere in the world to the Marshall network. There are also some sites on the Marshall network which you cannot access without first running your VPN software. For example, if you want to connect directly to your office computer, you would need to run the VPN client before you establish your remote desktop connection. If you have trouble connecting to a Marshall site, it probably means that you first have to run your VPN software. It is free and very easy to install.

All the information you need is here:

<http://www.marshall.edu/ucs/CS/helpdesk/helpdesk-remote.asp#install>

If you run into install problems, call the Help Desk:

(304) 696-3200 Huntington calling area

(304) 746-1969 Charleston calling area

(877) 689-8638 Toll free, outside the Huntington/Charleston calling areas
