### CLASS ASSIGNMENTS

**DUE DATES:** Assignments may be completed in advance of the due date, but the assignments **will not** be accepted after the due date. All assignments should be submitted through Blackboard. Please keep up with the semester, as it will go very fast. Late assignments will simply receive a grade of “0”. If you believe that you have received a grade in error, please contact the professor immediately.

**ASSIGNMENT SUBMISSION:** It is a good college practice to always keep copies of your work, both before and after grading, as assignments often get lost in cyberspace. Always include your name on the actual assignment before submitting it to Blackboard.

Please note that to simplify things, all due dates will fall on a Monday, except discussion questions.

**STUDENTS with DISABILITIES:** Marshall University is committed to equal opportunity in education for all students, including those with physical, learning and psychological disabilities. University policy states that it is the responsibility of students with disabilities to contact the Office of Disabled Student Services (DSS) in Prichard Hall 117, phone 304 696-2271 to provide documentation of their disability. For more information, please visit <http://www.marshall.edu/disabled> or contact Disabled Student Services Office at Prichard Hall 11, phone 304-696-2271.

### ACADEMIC DISHONESTY

**Plagiarism:** Copying another's work without proper citation of the source constitutes plagiarism. Plagiarism in any form will not be tolerated. A student that is found plagiarizing another's work will automatically receive an "F" in the course and may be subject to further university discipline.

**Cheating:** According to university policy, cheating is defined as the use of any unauthorized materials during an academic exercise to include notes, study aids etc. Cheating also includes the viewing of another person's work or securing any part of an assignment or examination in advance of distribution by the instructor. Cheating will not be tolerated in this class and will result in an automatic "F" for the class and the possible recommendation of suspension or expulsion from the university.

Please note that cheating also includes using someone else's notes to answer test questions, either from past classes, instructor responses to previous exams, or notes from current students enrolled in the class.

### OTHER UNIVERSITY POLICIES

By enrolling in this course, you agree to the University Policies listed below. Please read the full text of each policy at [http://www.marshall.edu/academic-affairs/?page\\_id=802](http://www.marshall.edu/academic-affairs/?page_id=802)

Students with Disabilities | Affirmative Action | Computing Services Acceptable Use | Dead Week| Excused Absences (undergraduate) | Academic Dishonesty | Inclement Weather | MU Alert |Academic Dismissal| Academic Forgiveness | Academic Probation and Suspension| Academic Rights and Responsibilities of Students| Sexual Harassment

### COURSE STRUCTURE

The course is broken into three separate Units. Each unit is followed by a Unit exam. Each Unit also includes **at least one** graded assignment. Ungraded assignments are also included in UNIT 1 and 3. These will be necessary to successfully complete the UNIT exams, but are not graded or turned into Blackboard. In addition, discussion questions will be periodically posted to provide opportunities for bonus points added to the next scheduled Unit exam. Unfortunately, it is often easy to stop logging in on a regular basis and these bonus points are to encourage those that make that effort. Each discussion question will be worth 0-3 points toward the next scheduled Unit exam. Keep in mind that students can score no higher than a 100% on any UNIT exam, including any bonus points.

**DUE DATES:** The assignments are **due by midnight** of the scheduled due date. Students may choose to move along more quickly in the course and submit assignments and Unit exams prior to the due dates, but they cannot move to the next unit until the Unit exam and assignments for that Unit have been completed, or the due date has passed. Any assignments not posted by the due date, will receive a "0" for the assignment and students can move on to the next Unit.

Please note that I continually update material so there may be additional material provided or slight changes made to current on-line material prior to each of the Unit exams. I will use announcements to alert you to any significant changes in material. Since many of the PowerPoints include active links, it is also possible that they are removed from the internet at any time. Should you be unable to access material from any of the slides due to disappearing links, please let the professor know immediately and an attempt will be made to replace the link with similar material.

**UNIT 1:** This set of files looks at concepts of persuasion in the media age. Persuasion has taken on a very different meaning with the advent of increased technology and our constant connection to others. The question becomes, has technology increased or decreased our ability to truly communicate with others? Assignment 1 addresses this question by asking you to consider the effect of the absence of technology on our society, should a catastrophic event such as a solar flare occur.

The Solar Flare paper gives you a chance to visualize the importance of technology in our relationships, the quality of our lives, and in our overall personal wellness. Consider if technology has helped or hurt our relationships with our friends and family. How would your life be different without it?

Assignment 2 is an ungraded assignment that will need to be completed before the UNIT I exam. **You do not need to submit this assignment** but you should complete it prior to taking the first UNIT Exam.

**UNIT 3:** The final unit looks specifically at the application of persuasion to a number of different situations, to include campaigns, propaganda, advertising, and interpersonal persuasion. The culture as it affects persuasion is also analyzed as it plays a very significant role. Assignment 4 is **NOT** to be turned in but should be completed before attempting to take the third Unit exam.

The final assignment in the course, prior to the third unit exam, is a chance for you to explore persuasion as part of the interview and resume writing process. Students are asked to prepare a functional resume using the format provided through the on-line resources. Although a draft is suggested, it is not required. All drafts must be turned in no later than April 6, 2015, to provide ample time for the instructor to review them, make comments, and return them to students for final changes.

## COURSE REQUIREMENTS

**SOLAR FLARE - Could You Survive?** - The purpose of this assignment is to consider how your life might be different in the event of a Solar Flare that wiped out all technology. The assignment should make use of what you know about the resulting society, after a major solar flare. Please consult a minimum of eight (**8**) outside sources and include them in your paper. Please cite your sources in the paper and in the list of references using either APA or MLA style guides. More information on these citation styles is available on the library home page and at Purdue Owl (<https://owl.english.purdue.edu/>) Please note that the Purdue Owl is an invaluable resource to provide grammatical, spelling, and format information for all research projects.

In a **5-7 page** double-spaced paper, you are to consider the following questions:

How would society be different without technology?

How is your life currently dependent on technology?

How would your life be different without the technology that would be lost with a major solar flare?

How would relationships change with your friends and family?

What would be the positive and negatives of the absence of technology in your communication?

If all technology should disappear, what commodity might you provide to survive? No doubt, we would need to go to a barter system, as money would have little value. What could you offer society if technology was removed?

Finally, how might persuasion change in a society that had no technology? Would this be positive or negative?

Keep in mind that the focus of the paper should be on communication, relationships and persuasion.

The assignment must be submitted electronically **NO LATER THAN February 2, 2015**, and is worth **10%** of your final grade.

**Persuasive Artifacts** – The purpose of this assignment is to determine the prevalence of persuasive communication theory in the variety of artifacts that we encounter every day. Students should attempt to find artifacts that specifically illustrate the noted theories. The theory should be briefly explained in “laymen’s terms”, the artifact offered, and then a connection made between the theory and the artifact chosen. Artifacts may include any type of persuasive message to include such things as billboards, newspaper stories, public speeches, magazine advertisements, pop-up advertisements, television commercials, etc. Students should provide as much information as possible for each artifact; non-print artifacts **must** be described in detail. Images of print documents should be provided whenever possible. Keep in mind that the explanation for each theory should not be a textbook definition but rather, stated in your own words. Additional requirements for this assignment can be found on Blackboard. A suggested chart is also provided for your convenience.

This assignment will be graded based on the following criteria:

1) clear understanding of the specific theory, 2) appropriate choice of an artifact to represent the theory, 3) strong rationale for connecting the theory to the artifact chosen, 4) correct identification of medium (oral, print, electronic or new media), 5) a variety of artifacts chosen so that all of the examples are not primarily found in one medium, and 6) a lack of typographical and grammatical errors. Please submit the assignment electronically to Blackboard **NO LATER THAN March 9, 2015**.

**Cover Letter/Resume:** This assignment is to give you the background for developing an effective resume and cover letter. Specifically, the resume and cover letter should reflect the specific audience, enhance your image management, utilize motivational arguments that would persuade your target audience, and integrate logical reasoning where appropriate. Please follow the instructions provided within the Power Points for maximum success. Please submit the final assignment to Blackboard **NO LATER THAN April 20, 2015**. If you choose to submit a draft resume and cover letter, please submit these **NO LATER THAN April 6, 2015**.

**Discussion Links:** Periodically, discussion questions will be placed on Blackboard for your consideration. It is important to note that these questions will only be posted for a few days and are to encourage you to continue

to check Blackboard on a regular basis. Should you decide to participate in a discussion link, please respond to those students that have already answered the question, rather than just answering the original question. Students can gain up to 3 points toward the next UNIT exam for each discussion question. However, should students do very well on the exam and answer all of the discussion questions effectively; they can only receive a total score of 100% for each UNIT exam.

**UNIT Exams:** Exams will consist of ten essay questions that review material from the on-line resources, the textbook, assignments, and discussion questions. At the end of each UNIT, a complete list of twenty potential exam questions will be provided. If you answer these prior to taking the exam, you need only cut and paste your answers into the exam, once you are ready to take it. Each student will receive ten randomly chosen questions from the supplied list of twenty; no two students will receive the exact same questions. Please note that the questions require not just listing a theory or idea, but successfully applying persuasive concepts to a variety of issues.

Please allow the appropriate time to take the exams, as you will only have an hour and a half to complete each one; since the exam is a timed test, you should immediately log back in if you get mistakenly logged out.

The UNIT Exams must be submitted electronically **NO LATER THAN** the following the specified dates. (UNIT 1- **February 16, 2015**; UNIT 2 –**March 9, 2015**; UNIT 3 – **May 4, 2015**)

**Please note that if for some reason your computer should shut down during a unit exam, you need to immediately log back in and continue completing the exam.**

In the past, students have had problems logging back in due to the ability to extend the test time. The system will only allow the instructor to EITHER set a specified test time and allow relog-ins, or allow students the opportunity to take more time for the Unit test, but not be able to relog-in should they become disconnected. Given past technology problems, the test time will be set so that students that become logged off may log back in and finish the test. Please note that this means that your test will automatically be submitted at the end of the specified exam time.

**SHOULD YOU EVER HAVE ANY QUESTIONS, PLEASE DO NOT HESITATE TO CONTACT ME!**
