

Forensic Analysis of Data Transience Applications in iOS and Android

September 19, 2013

Cindy Wu

Overview

- Background
- Materials and Methods
- Snapchat Results/Discussion
- Burner Results/Discussion
- Conclusion
- Future Considerations

The background features a dark blue gradient with faint, glowing white circuit traces and nodes. A horizontal white bar with a light blue gradient is positioned in the center, containing the word "Background" in a dark grey, sans-serif font.

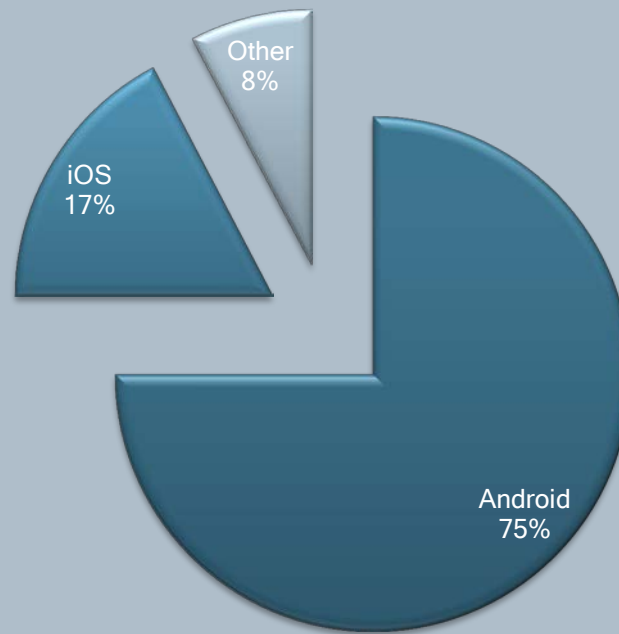

Background

What is Digital Forensics?

- The process of uncovering and interpreting electronic data for use in a court of law.
- New versions of operating systems, software applications, and hardware platforms are constantly being released in addition to new generations of mobile devices
 - Practices are constantly being updated
- Mobile forensics

Statistics

Market Share of Operating Systems

Mobile Phone Capabilities

Mobile Phone Capabilities

NOMOPHOBIA

Applications - Snapchat

“Snapchat is a new way to share moments with friends. Snap an ugly selfie or a video, add a caption, and send it to a friend (or maybe a few). They'll receive it, laugh, and then the snap disappears.”

- Team Snapchat

May 9, 2013

- “Also, if you’ve ever tried to recover lost data after accidentally deleting a drive or maybe watched an episode of CSI, you might know that with the right forensic tools, it’s sometimes possible to retrieve data after it has been deleted. So... you know... keep that in mind before putting any state secrets in your selfies :)” - Team Snapchat

Applications - Burner App

“Burner is an mobile application and service that enables users to obtain temporary, disposable numbers for voice and SMS communication. Fast, safe, and private, Burner lets you get as many numbers as you want, use each as a private line within your iPhone or Android, and "burn" a number whenever you're done with it.”

- Ad Hoc Labs, Inc.

Burner - Purchase Required

 **Get credits** REDEEM

Buy more credits
Use credits to create or extend burners

-  **3 Credit Pack**
\$1.99
3 credits you can use to purchase new numbers or extend existing numbers
-  **8 Credit Pack**
\$4.99
8 credits you can use to purchase new numbers or extend existing numbers
-  **15 Credit Pack**
\$7.99
15 credits you can use to purchase new numbers or extend existing numbers
-  **25 Credit Pack**
\$11.99
25 credits you can use to purchase new numbers or extend existing numbers

Redeem Promo Code

 **Create burner** GET CREDITS

Select a burner type
You have 0 credits remaining

-  **Mini Burner**
3 credits
Get a burner number valid for 7 days or 20 talk minutes or 60 texts.
-  **Standard Burner**
5 credits
Get a burner number valid for 30 days or 50 talk minutes or 150 texts.
-  **Large Burner**
8 credits
Get a burner number valid for 30 days or 90 talk minutes or 270 texts.
-  **Long Burner**
8 credits
Get a number valid for 60 days or 75 minutes of talk or 225 texts.

Get More Credits

About Burner

How are these Apps relevant to Digital Forensics?

- Snapchat has over 10 million Google Play downloads
- Burner has over 50,000 Google Play downloads
- Users who believe in the transience of the data will seek security in these third party applications
- Some may be criminals
- Revealing any recovery of artifacts or metadata can prove communication, association, and the presence of any questionable content.

Hypotheses

If Snapchat is used by Android and iOS users,
some transferred data will be recoverable
within a certain time frame

AND

If Burner is used by Android and iOS users,
some transferred data will be recoverable
within a certain time frame

The background features a dark blue gradient with faint, glowing white circuit board traces and nodes. A horizontal white bar is centered across the middle of the image, containing the text "Materials and Methods" in a bold, black, sans-serif font.

Materials and Methods

Testing Devices

LG Nexus 4 E960
Android 4.2.2 Jelly Bean

iPod Touch 3G
iOS v6.1.3

Other Devices Used for Data Exchange

- BlueStacks App Player (Snapchat Only)

- Personal Smartphone Devices

Application Criteria

- Known to be data transient
- Popular
- Available in both markets

Analysis Tools

Cellebrite® UFED Touch v1.9.0.130
with Physical Analyzer 3.7.2

AccessData® Forensic Toolkit v4.0

Android and iOS Device Setup

Restore to Factory Settings

Data Exchange for Snapchat

Data (videos and snaps) was exchanged with the two devices

- Opened
- Delivered
- Read
- Unread

A manual log in MS Excel

- Contact
- Content
- Date
- Status

Data Exchange for Burner

Data was exchanged with the two testing devices

A manual log of the contacts, content, and approximate timestamps was stored in Microsoft Excel for comparison to any recovered data

Two trials to determine:

- Whether recovery of data was possible
- Whether time elapsed played a factor
- Whether automatic expiration (Trial 1) or manual deletion (Trial 2) affected recovery of data

Image Acquisition

Android

iOS

Cellebrite UFED Touch

- Physical extraction
- File system dump

Cellebrite Physical Analyzer

- File system extraction
- Acquired both system and data partitions

The background features a dark blue gradient with faint, glowing white circuit board traces and nodes. A horizontal white bar with a light blue gradient is positioned in the center, containing the main title text.

Forensic Toolkit v4.0 Analysis

Analysis in FTK

- Used AccessData Forensic Toolkit v4.0.0
- All iPod images were added to FTK
 - TAR / ZIP files
- All Android images were added to FTK
 - ZIP files

Analysis in FTK for Snapchat

All data was carved for graphics

Discussion - Snapchat

Android device

- Log is recoverable
 - Received/Sent
 - Contact
 - Was Viewed
 - Timestamp
 - Status Message
 - mID
 - Etc.
- 'Clear Feed' causes log to be unrecoverable
- Some received images recoverable

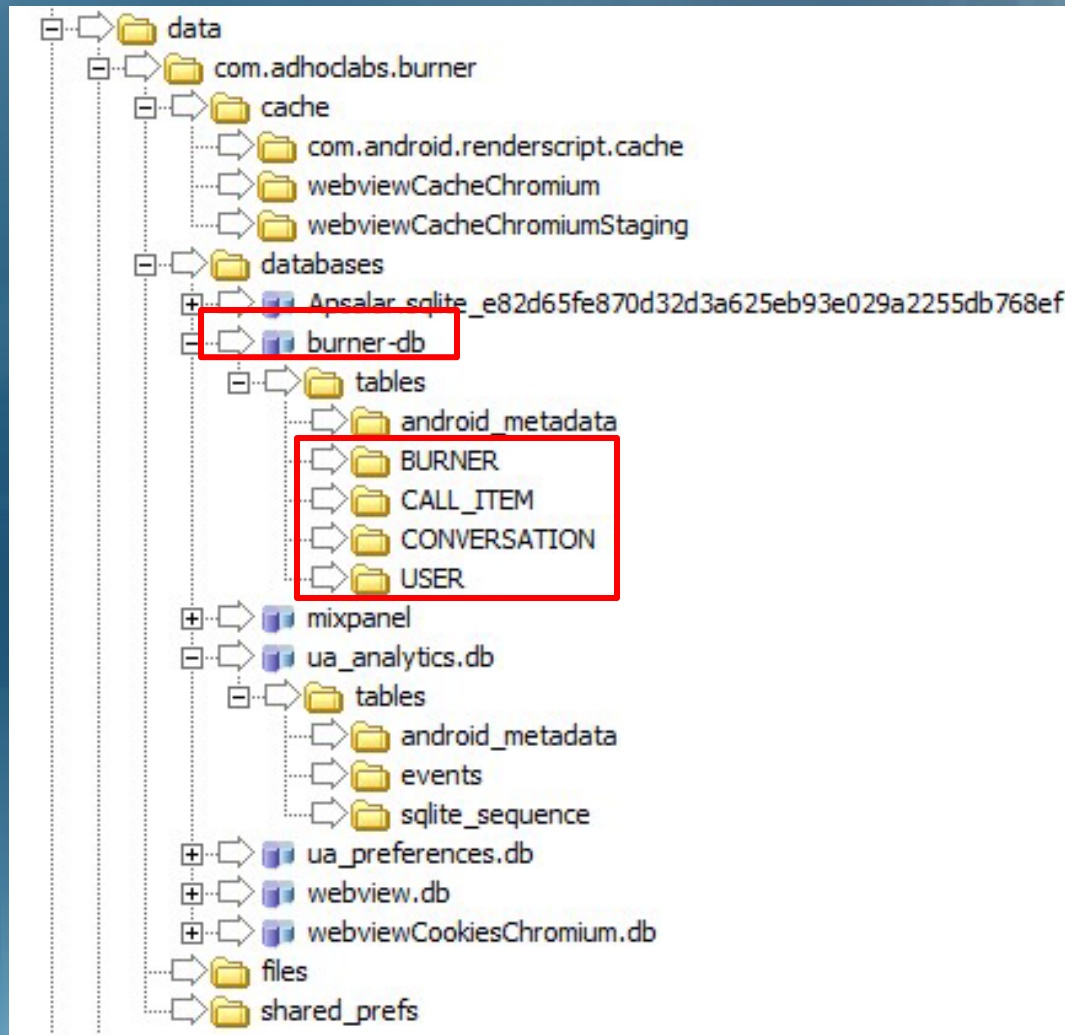

iOS device

- Log is recoverable
 - Received/Sent
 - Contact
 - mID
 - Timestamp
- 'Clear Feed' causes log to be unrecoverable

The background features a blue gradient with faint, glowing white circuit traces and nodes. A central white horizontal band contains the main text.

Discussion - Burner

Android device

- Log is unrecoverable after burner number expires

iOS device

- Log is recoverable only if number automatically expired
 - Received/Sent
 - Contact Numbers
 - Timestamp
 - Type
 - Message ID
 - Message Content

Conclusions

Android device

Snapchat data was recoverable

- 'Clear Feed' removes log

Received Snapchat images were recoverable based on time elapsed

No data was recoverable from Burner app regardless of how it was removed from the device

iOS device

Minimal Snapchat data was recoverable

- 'Clear Feed' removes log

No Snapchat images were recovered

All data from Burner app was recoverable for burner numbers that were not manually deleted

Future Considerations

Snapchat

- Determine estimated time before server completely removes a snap/video

Burner

- Test mobile network capabilities involving calls and voicemails

Similar Third-Party Applications
