Friday, March 7, 2008

MU-ADVANCE has analyzed workload and resource data based on MU-STEM faculty responses to our climate survey. These data have been compared to results from the 2007 Collaborative on Academic Careers in Higher Education (COACHE) survey on tenure-track faculty job satisfaction, which includes more than 6000 responses from university faculty. [More.....](#)

Meet the Faculty: Dr. Suzanne Strait

Dr. Suzanne Strait is full professor in the Department of Biological Sciences. She is currently developing an online museum of 3D models of Paleocene and Eocene fossils, using funds garnered from the National Science Foundation. She has led many expeditions to Wyoming, offering students a chance to experience field research firsthand. Currently, Dr. Strait teaches Human Anatomy. She has received many awards, including Phi Eta Sigma's "Fabulous Faculty Member."

Resource: What if Cinderella Were a Professor?

In her article "[What if Cinderella Were a Professor?](#)" Dr. Julie-Ann McFann has reinvented the fairy-tale. She has transformed the fairy princess from a housemaid into the modern-day female faculty member. Through a witty, comparative analysis, Dr. McFann has been able to compare Cinderella's wicked stepmother to the institutional culture, and her fairy godmother to academic mentors.

Recommendations or suggestions for additional resources for the MU-ADVANCE Office can be sent to Heidi Williams: (willi143@marshall.edu).
