

Changing Your Language Settings

This guide instructs the user in the proper method of changing the language settings of your system.

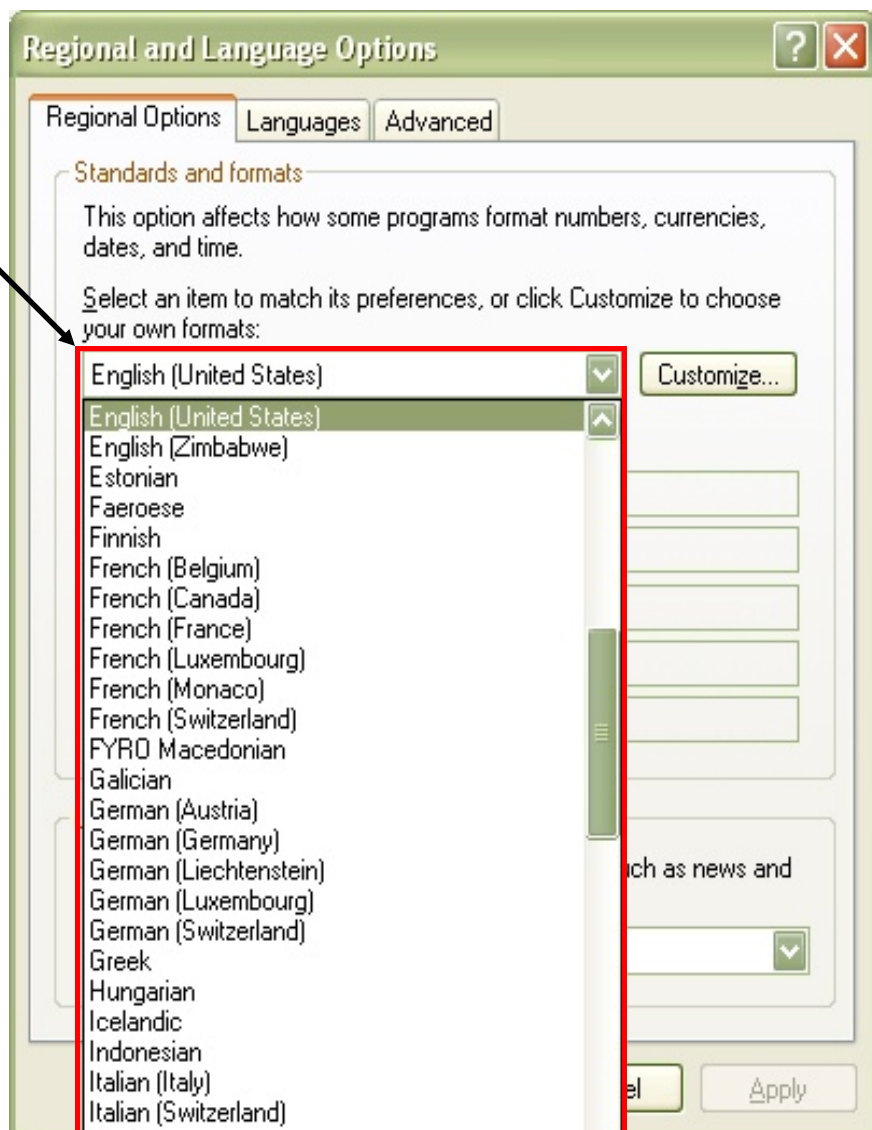

To change the language settings, you must first access the "Control Panel". Click the "Start" button, and then click on "Control Panel" from the menu.

When the "Control Panel" window opens, double click on the "Regional and Language Options" icon.

In the "Regional and Language Options" window, click on the pull-down menu in "Standards and Formats" section and select the language that is desired. You will then click "Apply" and "OK".

The "Language Icon" will now appear in your task bar. By clicking this, you will be able to set the language for the specific applications you are using.
