

Connecting to the MUNet VPN Service Mac OS X Leopard

Step 1. Go to www.marshall.edu/ucs/networking/vpnintro.asp.
Click **Download VPN Client**.

The screenshot shows a web browser window displaying the Marshall University Computing Services website. The page title is "VPN Client". The main content area contains the following text:

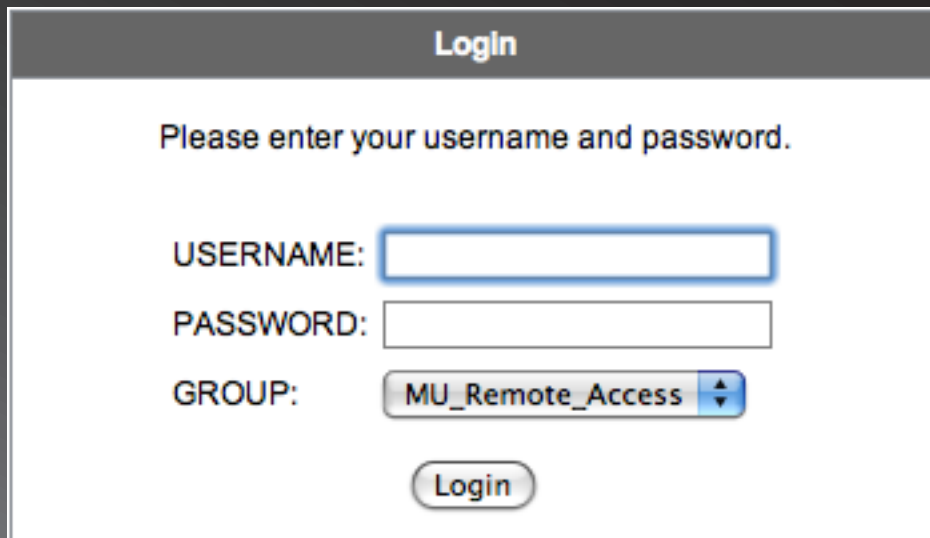

The VPN is a service provided to Marshall University Students, Staff and Faculty for securely connecting back the Marshall University Network (MUNet) over a commodity network such as the Internet or dialup.

By connecting to the VPN from off campus you will be able to access campus services and resources as if you were on campus. These services include accessing network shares and email access via the MU Exchange Server using the Outlook client.

To begin using the VPN service you will need to obtain the Cisco Anyconnect VPN client for your operating system and have a valid MUNet account. For information on obtaining a MUNet account or if you have trouble obtaining the client contact the Computing Services Helpdesk at 696-3200 or by emailing helpdesk@marshall.edu.

Below this text, there are links for "Connecting to MUNet VPN Instructions" and "Microsoft Vista". A red arrow points to the "Download VPN Client" link, which is accompanied by the text "This service is only available from off campus."

Step 2. Enter your **USERNAME** and **PASSWORD**.

The screenshot shows a "Login" form with the following fields and a button:

Please enter your username and password.

USERNAME:

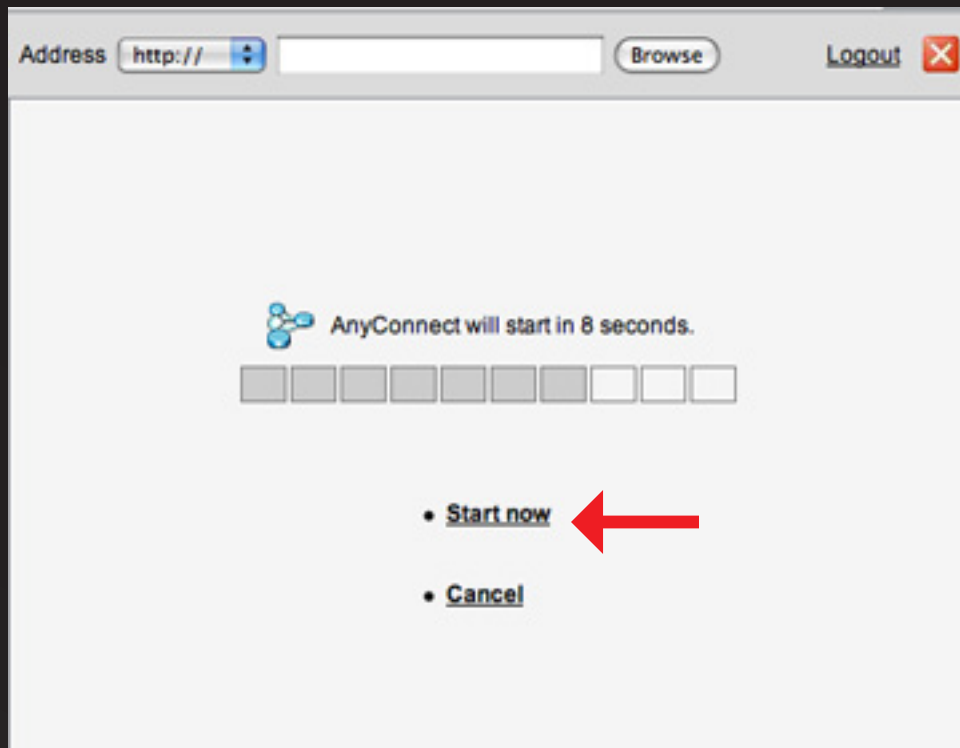

PASSWORD:

GROUP:

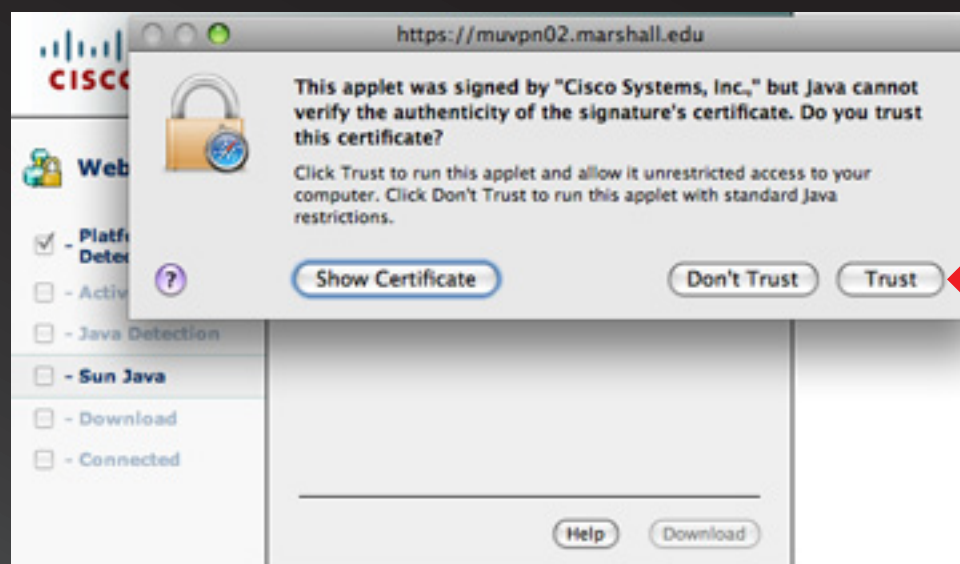

Login

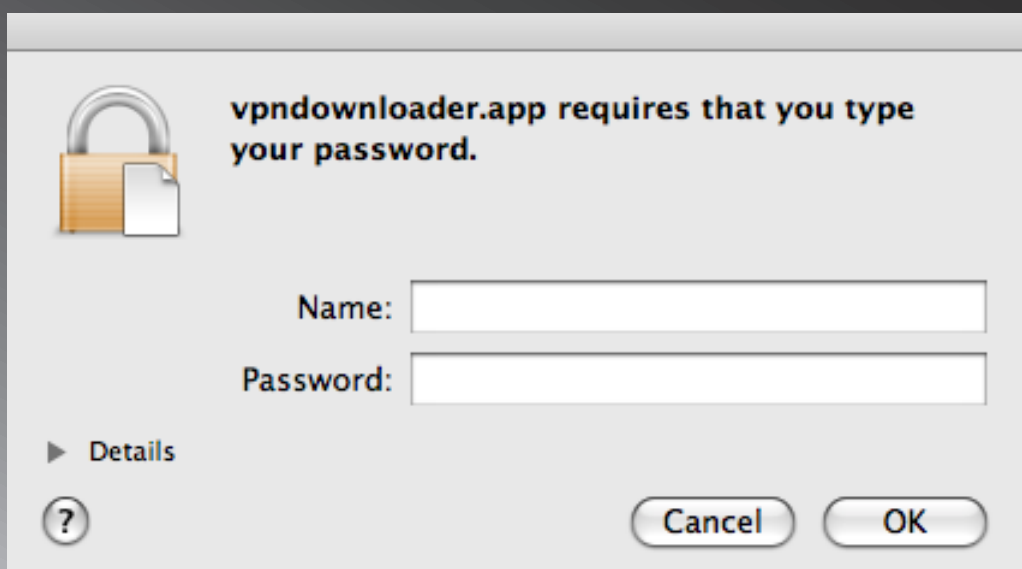

Step 3. AnyConnect will start automatically or you can *click Start now*.

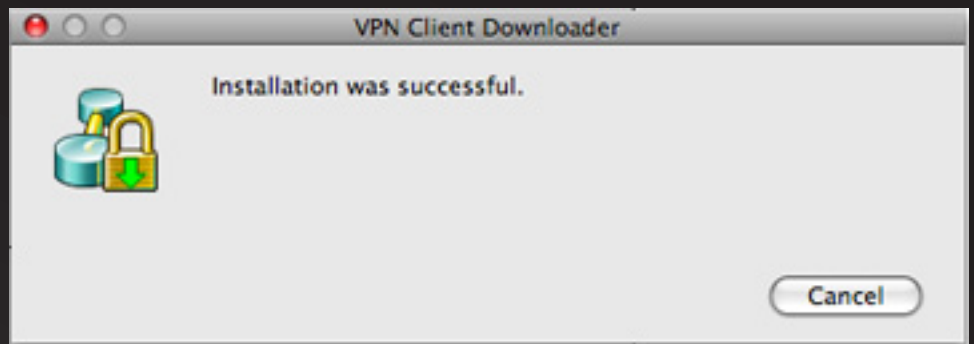

Step 4. *Click Trust*.

Step 5. *Enter your USERNAME and PASSWORD.*

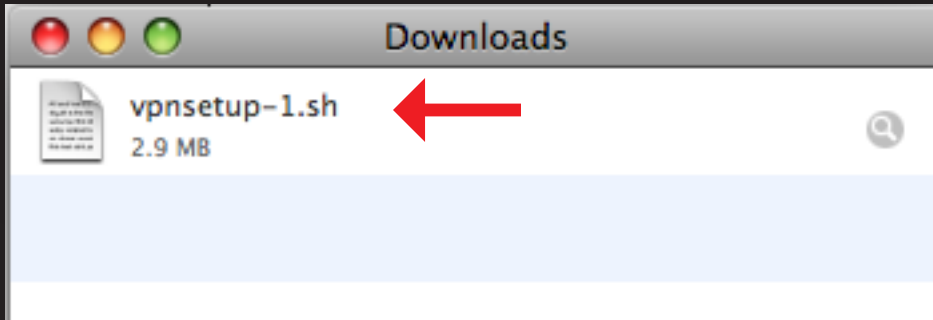

Step 6. You will see the following screens.

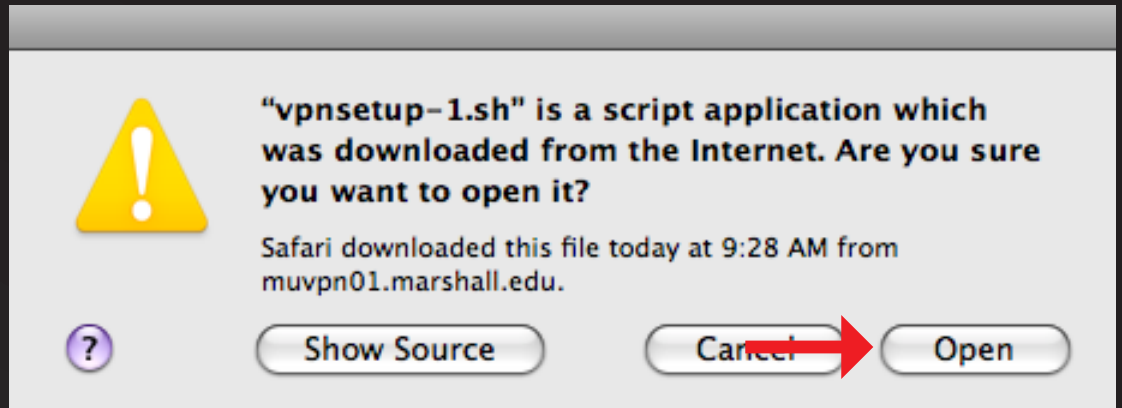

Step 7. If you see this error, *click* **Mac OS X 10.4+ (intel)**.

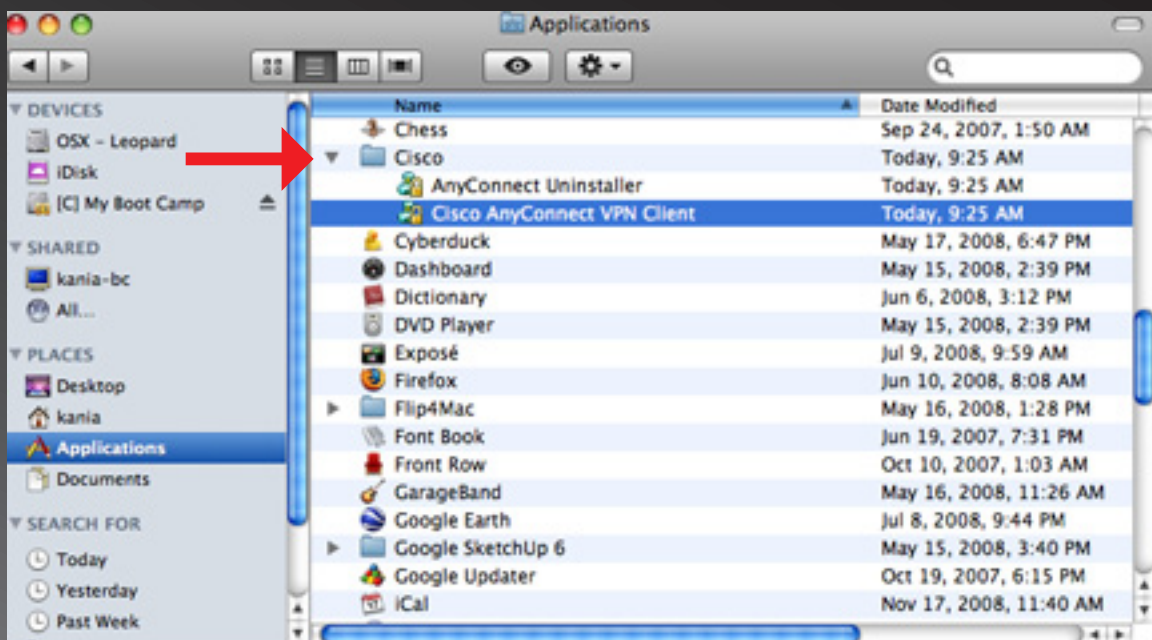

Step 8. Double-click **vpnsetup.sh** in your Downloads window.

click **Open**

Step 9. Once it is open, go to **Applications** in the Finder menu and open the **Cisco** folder. Double-click **Cisco AnyConnect VPN Client**.

Step 10. If it does not automatically appear type **MUVPN** into the **Connect to:** box. Enter your **USERNAME** and **PASSWORD**.

Step 11. When you are ready to disconnect from the MUNet VPN Service you can *Double-Click* on the **AnyConnect** Icon in your Dock and select **disconnect**.
