There are a variety of majors offered in the College of Science at Marshall University. With some majors, students can choose an area of emphasis.

- Biology
- Biomedical Sciences
- Cellular/Molecular Biology
- Ecology and Evolutionary Biology
- Microbiology
- ACS Chemistry
- Biochemistry
- Chemistry
- Environmental Chemistry
- Forensic Chemistry
- Geology
  - Engineering Geology
  - Environmental Geoscience
- Computer and Information Technology
- Environmental Science
- Integrated Science & Technology
  - Biotechnology
  - Assessment & Policy
- Applied Mathematics
- Mathematics
- Natural Resources & Recreation Management
- Physics

**Students in Science at Marshall will . . .**

**Enjoy** small classes

**Experience** excellent instruction by outstanding professors

**Live and learn** in a safe and friendly environment

**Access** the internet via wireless connections—bring your laptop!

**Learn** to conduct research as partners with professors

**Become** proficient in scientific methodology

**Use** the most up-to-date sophisticated scientific instrumentation

**Prepare** for excellent employment opportunities or to enter advanced or professional degree programs

Marshall University
College of Science
What an exciting time to be part of the Marshall University College of Science!

In a rapidly expanding global economy, the Marshall University College of Science is constantly growing in order to keep up with the trends facing the science and technology fields today. The College of Science has many exciting opportunities to offer its students: classes, research projects, internships, capstone experiences, field work, lab projects and so much more! Dedicated faculty and staff as well as state of the art facilities and equipment help to make this possible. With the opening of the Robert C. Byrd Biotechnology Science Center in the Fall 2006 and with the Science Building located right on the main Huntington campus, students will have access to many valuable resources and countless opportunities!

Student Success

The College of Science is dedicated to helping its students succeed in all aspects of their college life. Because of this, each semester all freshman and sophomores enrolled in the College of Science are required to meet with an Academic Advisor in the College of Science, Office of Student Services prior to registering for classes. Juniors and seniors are required to have an official class evaluation done each year in the Dean's Office. These mandatory policies for College of Science students help to ensure academic success and make sure that the students are on track for a timely graduation. The Office of Student Services can also provide students with many resources available to them at Marshall University. In addition, students are also assigned a Faculty Advisor, from whom they will receive career advising. Tutoring services are also available to all students. The College of Science will make every attempt possible to make sure its students years at Marshall University are successful and enjoyable.

Admission Requirements

Along with meeting the general admission requirements to Marshall University, a student must have the following test scores to declare the major of their choice in the College of Science:

- ACT— a minimum of a 21 math and a 21 composite
- SAT— a minimum of a 500 math and a 1000 composite

If a student has a 19 or 20 math and 19 or 20 composite ACT score or a 460-490 math SAT score and a 900-970 composite SAT score, they can enroll in the College of Science declaring Pre-Science as their major. Pre-Science students will be able to declare the major of their choice once they:

- Receive a C or better in ENG 101 and
- Receive a C or better in MTH 127 or MTH 130

By choosing to enroll in the College of Science while attending Marshall University, a student will be able to open many different doors to their future. College of Science Graduates go on to professional schools, such as medical school and graduate school, while others join the workforce in areas such as pharmaceutical companies, government agencies, schools, universities, private organizations, energy companies, research facilities and many more. The opportunities are endless.

Academic Departments

The College of Science houses six academic departments. For more information on a department, a specific major, degree or courses, please contact the individual department.
