 - Blackboard will be down for maintenance starting at 5:00 PM on December 20th and lasting until approximately noon on December 21.
 - The update should fix widespread errors that faculty and students are receiving when they are in the middle of an assessment, grading, or adding content.
 - This update should also allow us to use Ally for more tools in Blackboard, so it will help when creating text as content in courses.
 - Every new distance education course moving forward will use the accessible course syllabus format. We started this process fall 2018.
