Promoting and Changing Student Behavior Starts with Strong Tier 1 Classroom Practices

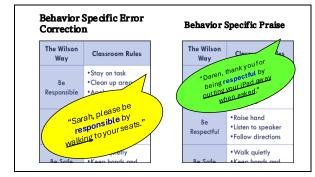

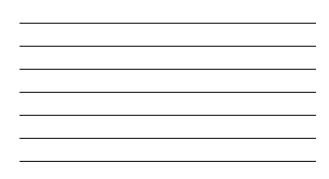

Strong Tier 1 Classroom Practices Significantly Reduce the Need for Tier 2 Interventions

- Active Supervision
- Teaching and Reteaching Expectations, Procedures and Routines
- Engagement and Opportunities to Respond
- Fee db ack and Ackn owled gments
 Behavior Specific Praise
 Behavior Specific Error Correction
- Pre-Correcting and Prompting Expected Behaviors

Classroom Walkthrough Tool For Administrators

Purpose: This form is used as part of completing the SWBISG essential dassroom procedures walkthrough to ass ess the teacher's level of implementation of classroompractices.

- Importance:

 • Tracks teacher implementation

 • Serves as an onset to behavior problems with students

 • Heig administrator know what teachers need Poin specific areas

 • Assists with two-way communication between teacher and administrator

Understanding Function of Behavior and ABCs and

MARSHALL

• Behavior is defined as anything we can see a person doing.

 It does not just refer to "bad" behavior but also includes skills!

٠	Challenging Behavior is often used
	by an individual when they don't have
	the skills to communicate thoughts,
	desires, or un met ne eds in an
	appropriate manner.

Behavior Serves a Purpose or a **Function**...

FUNCTION OF BEHAVIOR

What is Function-Based Thinking?

- Function is the underlying rea son for a behavior.
 - What drives the behavior.
- Identify the function of behaviors and the significant role Select interventions that match the function of the behavior.

A Process • Defining problem behaviors

General Education Teachers Can Have An Important Role

Understanding Why Problem Behaviors Occur

Attention:

The student *receiv* attent io n after engaginginthe hehavior. (Great Job! Stop That!)

Escape: Following the target behavior, the student is able to escape from an on-preferred task.

The student is engaging in the behavior because it "feels good" or helps them self-regulate.

The student engages in

the target behavior after

being told "no" or "wait".

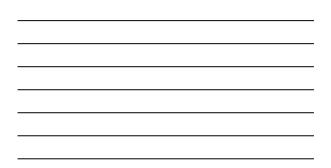

Access:

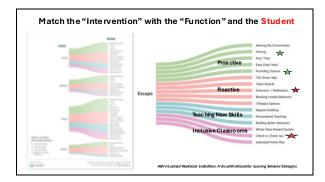

Sensory:

The student does not need the teacher to have reinforcement.

Does the Student Need an FBA/BIP?

FBA: Functional Behavior Assessment BIP Behavior Intervention Plan

- Any student not responding adequately to classroom interventions and modified interventions (Tier 1 and Tier 2)
- Exception to the system: Adult perceives student as being in urgent need (lower-level support is not seen as adequate)
- Data-based decision-making: Data review identifies students in need (# of ODRs, suspensions, absences, high-intensity, frequency, etc..)

Intervention vs Consequence

An **intervention** is an "<u>action" taken to improve a situation</u>, while a **consequence** is the "<u>outcome" of a behavior</u>.

 In behavior modification, interventions can include strategies to prevent unwanted behaviors or from behaviors escalating in addition to teaching a skill when there is a deficit, while consequences are the outcome of those behaviors.

Maintaining Consequence

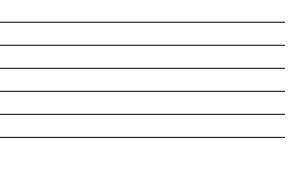

• If a behavior is continuing to occur, it is being reinforced...

• A Reinforcer:

• is an item, activity or event that <u>follows</u> a behavior and results in an <u>INCREASE</u> in that behavior.

The <u>Maintaining Consequence</u> is a very concrete example of the <u>Function At Work</u>.

Who Are We Disciplining?

Question???

On Average, how many of your students have a history of Trauma or are living in Poverty?

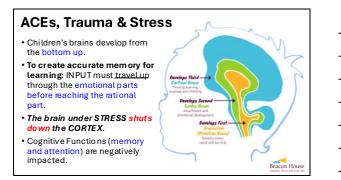

Students with High Office Referrals... may also have High ACE Scores Adverse Childhood Experiences Experience of abuse (verbal, physical, or sexual) or neglect (emotional or physical) Parental separation or divorce Witnessing domestic violence Substance abuse in the home Mental illness in the home Suicidal household member Parental incarceration Death of a parent or another loved one

Standard Ways to Respond & Teach Basic Behavior

- Direct Instruction & Natural Consequences:
 - "Use nice hands, we don't want to hurt others." If not, you may
 - "Raiseyour hand before answering." If not, you don't get called on.
 "Turn in your homework." If not, you get a 0.
- If direct instruction, expectations, rewards, punishment, and natural consequences don't work what do we do?

Change your Perspective?

• Could the student want to do well, but just can't?

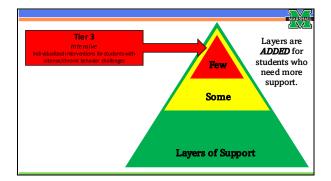

We aren't born practicing Self-Regulation

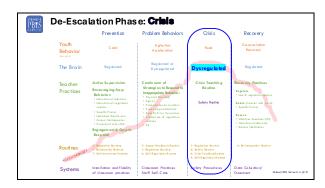

Students from poverty often have emotional dysregulation:

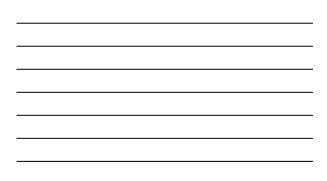

- give up more easily on challenges
- often find it difficult to work in groups
- may have difficulties with manners.

Je nsen , Teac hing wi th P overt y in Min d (2 009).

Peak / Crisis

In the classroom

- Highest point of escalationDisruption is so serious class
- can't continue
- Student is in rage and out of control
- Represents a threat to safety

Adapted from Colvin, G., & Scott, T. M. (2015). Monoping the Cycle of A ding-Out Behavio in the closer own Second Biltion. Thousand Oaks : ConvinA SAGE Company

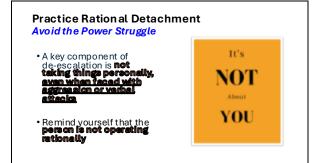

Student Behaviors

- Serious destruction of property
- Physical attacks
- Self-abuse
- Severe tantrums
- Running Away

How We Respond Matters

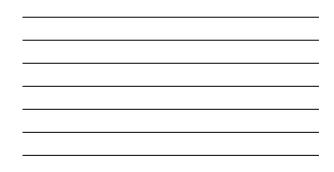

Control our Own Frustrations

Think honestly... when someone is aggressive with you or rude to you, what is your first thought?

What If The Answer is:

"NO"...."I'm Not Regulated"

	Prevention	Problem Behaviors	Crisi s	Rec overy

A Place for Teachers to Self-Regulate

Not Ideal!!!

An "adult" practice and routine to help staff stay regulated and support students in a behavioral crisis to regain self-control.

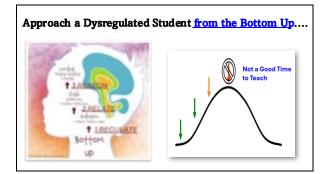

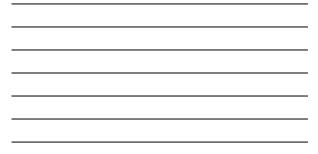

A Dysregulated Adult cannot Regulate a Dysregulated Child

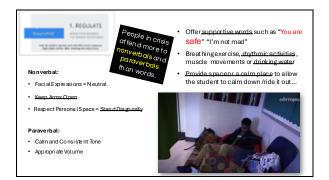

- Students who are having difficulty with self-regulation first need **co-regulation**.
- Co-regulation: when two people are in sync, allowing each person to move up or down to regulate the other person to become calm and engaged.

 2. RELATE
LARGE PROFE THE

Verbal:

- Talk slow_in short sentences without a lot of questions
- Don't focus on the problem orprovide a <u>consequence</u>

 Use reflective questioning = "What's going on?" rather than "Are you OK?"

 Avoid judgement and sarcasm

• Validate Emotions (even if they are irrational) "That can be frustrating."

 Partner with someonet bey connect with (signal: yellow folder in arm)

Debrief with the Regulated Student

Well after the event...

- Make sure emotional control is regained
- Disc uss the facts of the incident Identify patterns or triggers •
- Identify alternate responses to the triggers
- · Decide what supports are needed
- Negotiate future approach, expectations, behaviors, and consequences
 Decide a bout consequences for the current situation

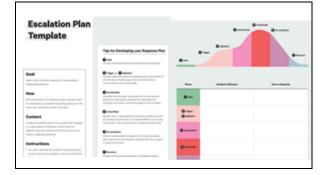

Debrief with the Teacher

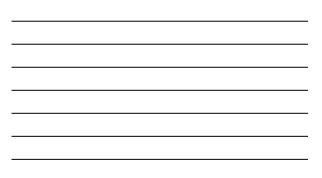

- Initial Check-in and Support
- Teacher's Voice
- Follow Up with the Incident
- Resources
- Long-Term Support

We Can Improve...

Do the best you can until you know better.

Then when you know better, do better.

-Maya Angelou
