2 Policy

- 2.1 Promotion in rank is a reward for achievement. It is based on the professional qualifications of a faculty member, including performance specific to the candidate's contractual responsibilities and duties. Major faculty responsibilities and duties include teaching and advising, scholarly and creative activities, service to the university, and professional service to the community. Individual colleges are responsible for determining the relative importance of the various faculty functions for purposes of personnel decisions. Colleges should provide flexibility in the weighing of such functions in order to accommodate a range of departments, disciplinary specialties and individuals with varying assignments.
- 2.2 The specific areas, in which faculty are evaluated for promotion, include the following:
 - 2.2.1 Teaching and advising: command of disciplinary knowledge and methodology; effectiveness of classroom performance; advising load and effectiveness of academic advising; effectiveness in assessing student learning; rapport with students; contributions to curricular development, including development, promotion and delivery of off-campus academic programs, either through electronic means or conventional travel to off-campus course locations; instructional development of faculty colleagues, etc.
 - 2.2.2 Scholarly and creative activities: number, quality and importance of publications and creative productions; memberships and contributions to professional societies; professional growth and development; scholarly presentations and creative performances; contributions to the professional development and achievement of colleagues, etc.

- 2.2.3 Service to the university: contributions within the department/division, within the college, or university-wide; contributions to official student organizations or other university-related organizations; other work on behalf of the student body, faculty, staff or administration of the university.
- 2.2.4 Service to the community: service on a compensated or pro bono basis to governments, to educational, business or civic organizations, or to the public. (Such service could include applied research, consultation, technical assistance, special forms of instruction, clinical work and performance). Involvement as an official representative of Marshall University, or units thereof, in activities of governments and of educational, business or civic organizations.
- 2.3 For purposes of promotion, as well as other personnel decisions, all relevant faculty activities should be subject to objective qualitative evaluations.
- 2.4 Teaching is subject to evaluations by students and peers. The latter may visit a class or classes, or examine and evaluate course materials such as syllabi, textbooks and examinations. For a scholarly publication or presentation, critical appraisals from scholars in the same field might be solicited. For public service qualitative assessment should be solicited from those associated with the service activity or affected by the service outside the university. Colleges are encouraged to refine and clarify these guidelines and to develop specific performance standards for application to their faculty. All college policies and guidelines relating to the promotion process, including the determination of appropriateness of the degree to the teaching field, which is to be made by the dean of the college, must meet or exceed the policies as specified in this chapter and shall be reviewed and approved for consistency with university and Higher Education Policy Commission's (formerly the Board of Trustees) policies by the Faculty Personnel Committee and the Provost and Senior Vice President for Academic Affairs or, where appropriate, the Vice President for Health Sciences.
- 2.5 Requirements for the Rank of Instructor
