# Why attend the Career Fair?

## 1. Get Comfortable

The first time you walk up to a potential employer, you will feel a bit nervous. For some, it may be the hardest thing they have ever done. It will give you a chance to practice your elevator speech and follow-up skills. This is not something you can easily do with an online job search.

## 2. To Present Yourself as a Person, Not a Piece of Paper

Career Fairs offer job seekers a chance to make a lasting impression on employers by interacting with them personally—it is impossible to make this type of connection when submitting a resume. In addition, meeting a job recruiter for a company in person could potentially make up for what your resume may lack. This could ultimately allow you to get your foot in the door with a company that interests you.

## 3. Land a Job or Internship

This is the main reason why people should attend a career fair. If you make a good impression, you may end up with an interview right on the spot. Even if they don't interview you immediately, they will take your resume and get back to you at a later time. The more contacts you make, the more opportunities you will have to land a job or internship. Online job searches can lead to jobs and internships, but why limit your opportunities?

# What to Expect

## Check-In

Check-In at the registration table and receive a map of employer booths.

## Introduce Yourself
