## Nursing Assessment of Individuals I

Faculty Member

### Bethany McFann

Department

### Nursing

#### Student Purpose

Identify health promotion limitations across the lifespan existing in the local community.

#### Community Impact

Serving and providing education on health promotion, health and wellness topics to an underprivileged population while using basic fundamental nursing assessment techniques.

#### Community Partner

- Huntington City Mission

#### Student Quote

“I loved being a part of serving. Helping and caring is a huge part of nursing practice and understanding the situations of all the backgrounds I serve can help me expand my practice.”

#### Faculty Quote

“This was my first semester implementing service based learning in my course, and it was amazing. With nursing being a serving profession, it was a great experience for first semester nursing students. Our community partner was fantastic, and students really seemed to enjoy the service. It gave students immediate hands on experience and opened their eyes to the health disparities existing right in their community.”
