The Master of Science in Information Systems program at Marshall University addresses the effective analysis, design, creation, management and evaluation of information systems for individuals and organizations. This graduate program, offered through Marshall's Lewis College of Business, offers an immersive educational experience blending business, information technology and the human element. The curriculum program includes 36 credit hours.

The M.S. Information Systems program trains students for advanced IT and information management careers. It is an ideal degree for working professionals in business or government information technology fields to advance their careers through graduate education.

Additionally, the program provides educational and research resources that encourage students to conduct high-quality and innovative research to advance the field of information technology and to bring economic opportunities to West Virginia and beyond.

M.S. INFORMATION SYSTEMS

Why choose a master's degree in Information Systems at Marshall University?

- At Marshall, students are not required to have a computer-related undergraduate major to enroll in the Information Systems master's degree program.

- Graduates will gain a solid foundation in the various business disciplines and gain an understanding of the effective use of information technology in business or organizational settings. Our graduates are effective users, designers and developers of computer information systems, adding value to processes and products in organizations.

- Marshall University graduates from the M.S. Information Systems program have benefited from one-on-one instruction and extra effort from committed and experienced faculty members.

A STEM-designated program

Information Systems is part of the burgeoning science, technology, engineering and mathematics (STEM) field, and qualifies as a STEM-designated degree program by the U.S. Department of Homeland Security. In this way, the Information Systems degree at Marshall is ideal for students wishing to work in value-based environments and is beneficial for international students trying to extend their OPT status.

Accreditation

Marshall and its programs are accredited by the Higher Learning Commission (HLC). The Lewis College of Business, which houses the M.S. in Information Systems, is accredited by the Association to Advance Collegiate Schools of Business International (AACSB), the benchmark of quality business education worldwide.

Admission requirements

To qualify for this program, students must have a four-year bachelor's degree with a GPA of 2.75 or higher on a 4.0 scale. Students must also have taken a programming language class and earned a C or better, or complete one during their first semester of coursework and earn a C or better.

Applicants should follow the admissions process described in Marshall's Graduate Catalog or on the Graduate Admissions website at www.marshall.edu/admissions/graduate.

Students from outside the U.S. can find Marshall's international student information at www.marshall.edu/cip.
