

PREVENTION

Data to Practice: Virtual Training Series

Making Surveys Work for You

This interactive session on the basics of survey development and implementation is geared toward prevention practitioners, community coalitions and other community groups that would like to learn how language, approaches and methodologies can help them get the data they need to help their communities.

September 25th

2 pm

Learning Objectives:

- Participants will learn the basics of survey methodologies
- Participants will understand that sometimes knowing what not to do and what you hope to accomplish with your survey are just as helpful as being an expert on surveys and statistics
- Participants will learn pitfalls, tips and tricks to get what you want out of surveys

Trainer: Sarah Surber, PhD, JD

Biography: Dr. Sarah Surber is an assistant professor in Marshall University's College of Engineering and Computer Sciences and teaches in occupational safety and health. Her PhD is in occupational and environmental public health. Her survey experience has ranged from health behaviors and workforce issues down to helping understand college students' issues with the COVID transition and organizing conferences. She's also an experienced lawyer who knows when to not use leading questions and when to use them to get what you need.

CEs: A certificate for 1.25 CE's approved for West Virginia Certification Board for Addiction & Prevention Professionals (WVCBAPP) credentials will be provided to all individuals attending this webinar and completing the learning check questions.

Funded by the West Virginia Department of Health & Human Resources Bureau for Behavioral Health by a Partnerships for Success (PFS) grant from the federal Department of Health & Human Services Substance Abuse and Mental Health
