

# CREATING A POWERPOINT PRESENTATION

Ian Levstein, MS  
Forensic Science Center  
Updated, Fall 2013

# Why a Presentation?

- ▣ A presentation is your opportunity to
  - make a point → loudly and clearly
  - stimulate interest and discussion
  - receive feedback on research
  
- ▣ A presentation is not
  - a research paper copied to a bunch of slides

# Overview

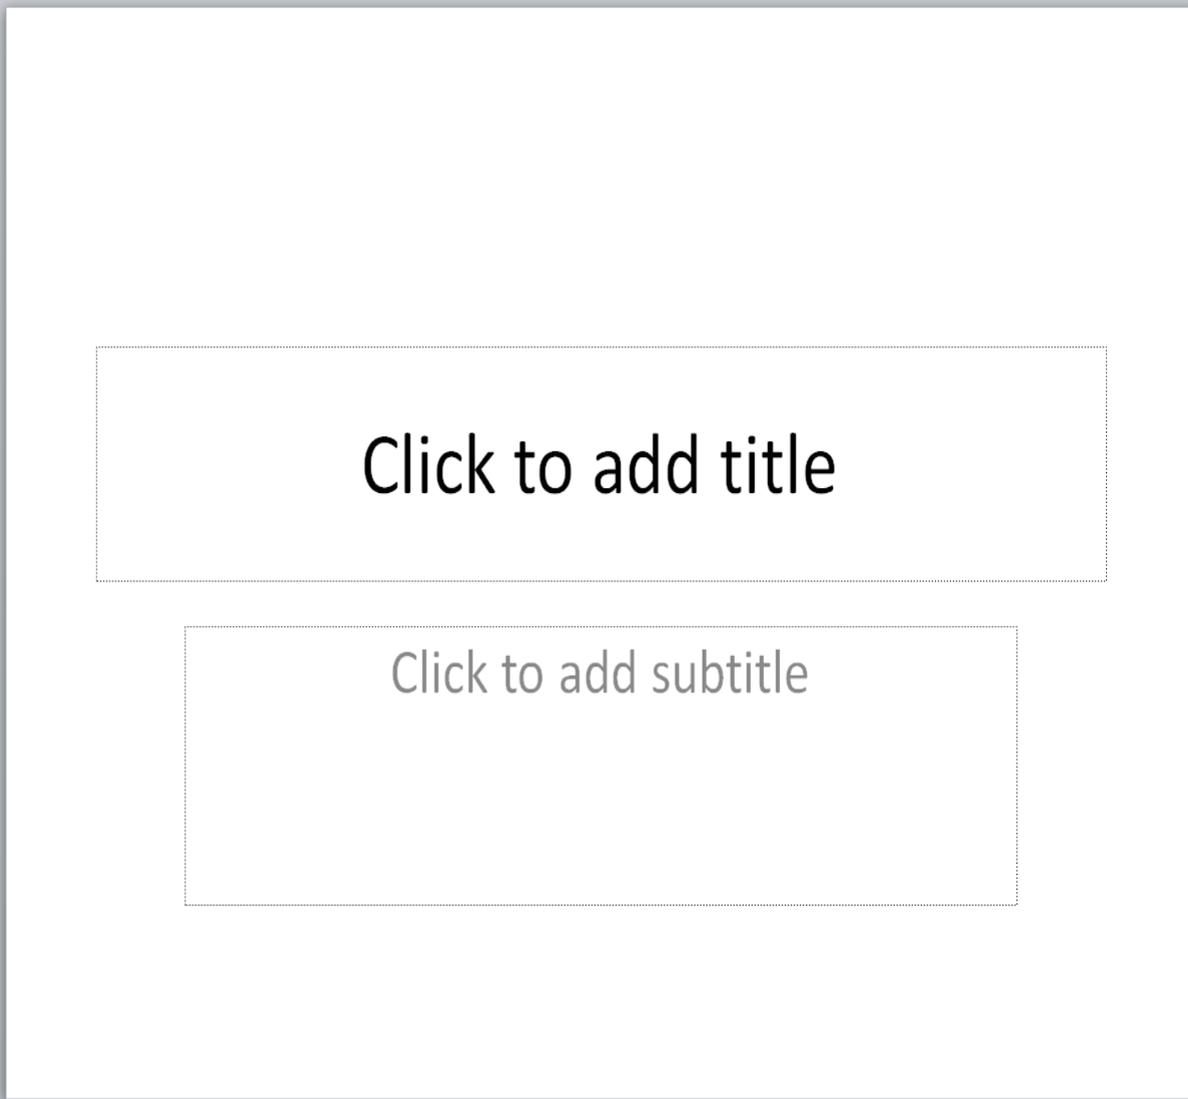

- ▣ Getting Started
  - text, text boxes and images
- ▣ Themes & Backgrounds
  - what works and what doesn't
- ▣ Special Effects
  - animating your presentation

# Getting Started

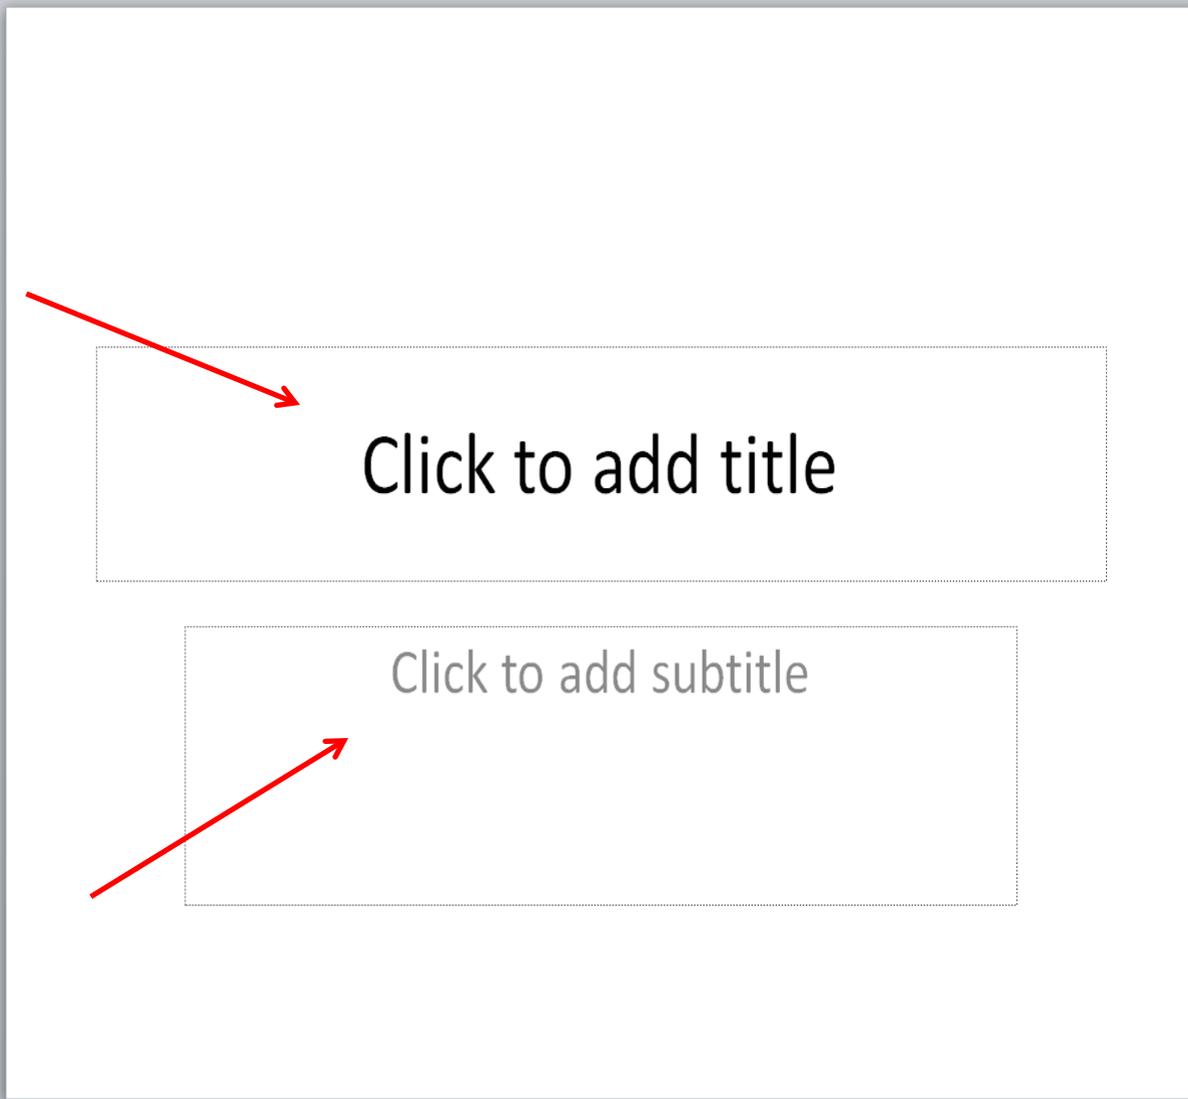

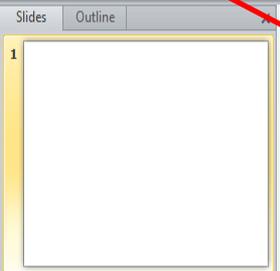

- ▣ Allow lots of time to create
  - a good presentation takes time
- ▣ Start Powerpoint
  - by default, blank with 2 text boxes

Slides Outline x

Click to add notes

# Text

- ▣ Text should already exist
  - don't try to edit and compose at the same time
  - several small text boxes are better than a single large one
  - can be resized
  - can be justified
  
- ▣ Always acknowledge your sources

# Text (cont.)

- ▣ Why text boxes?
  - easy to place anywhere on the slide
  - can be animated
  - can be time delayed
- ▣ To create a text box
  - Office 2010:
    - ▣ click on Insert, and select “Text Box”

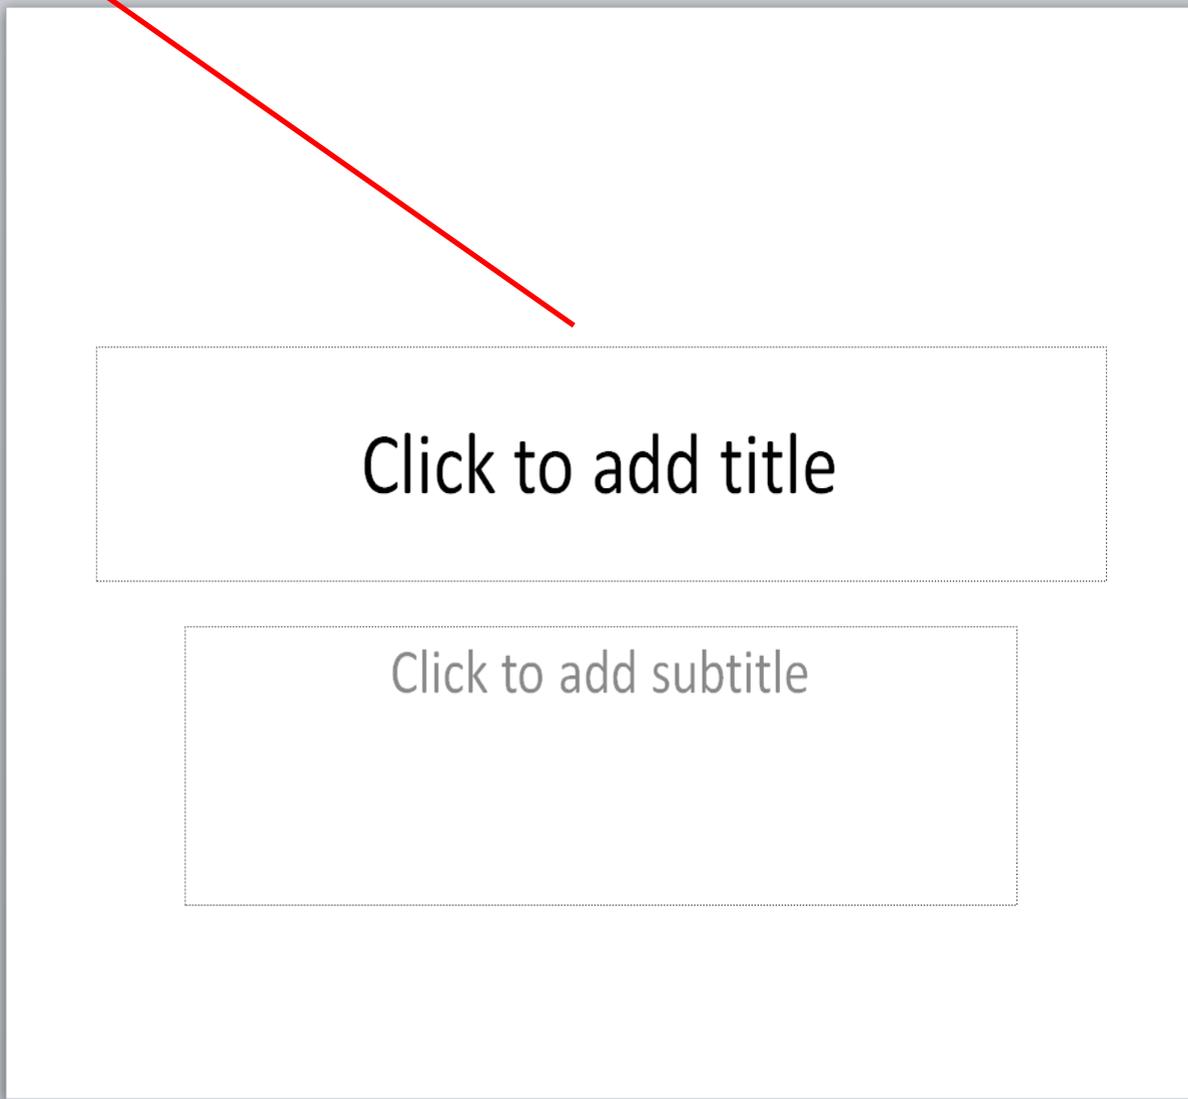

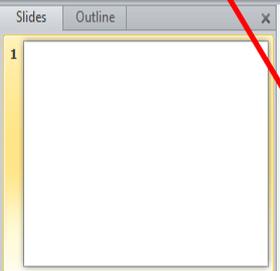

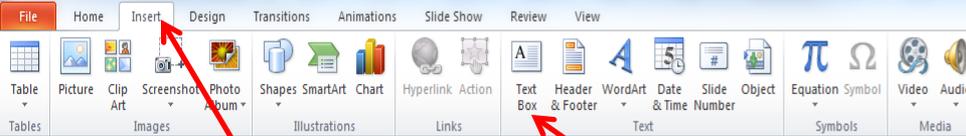

# Text (cont.)

This text box is  
at the top left

This text box is  
at the top right

And you can't do  
any of that using the  
default text area!

This text box is at  
the bottom middle

Click to add notes

# Images

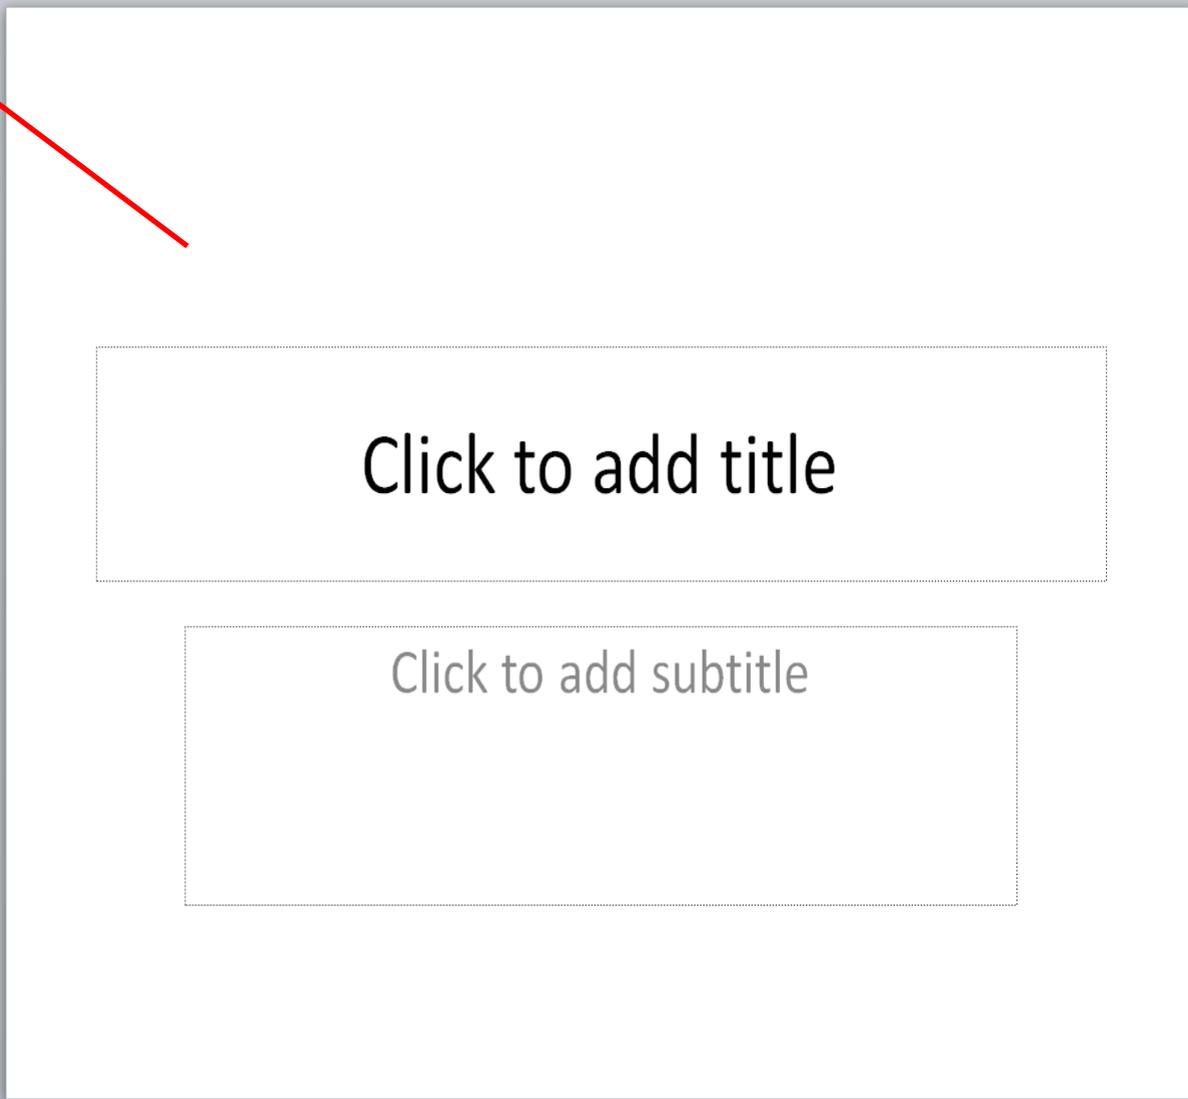

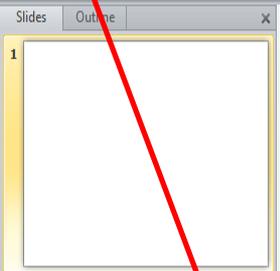

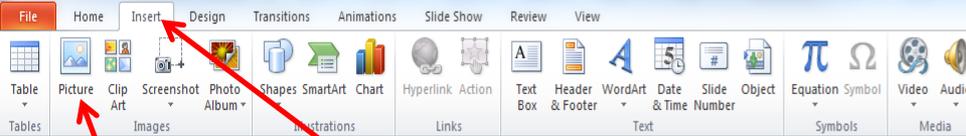

- ▣ GIFs or TIFFs
  - uncompressed
  - even low quality images look good when large
  
- ▣ JPGs
  - compressed
  - low quality images look pixilated when enlarged
  - high resolution images may be okay

# Images (cont.)

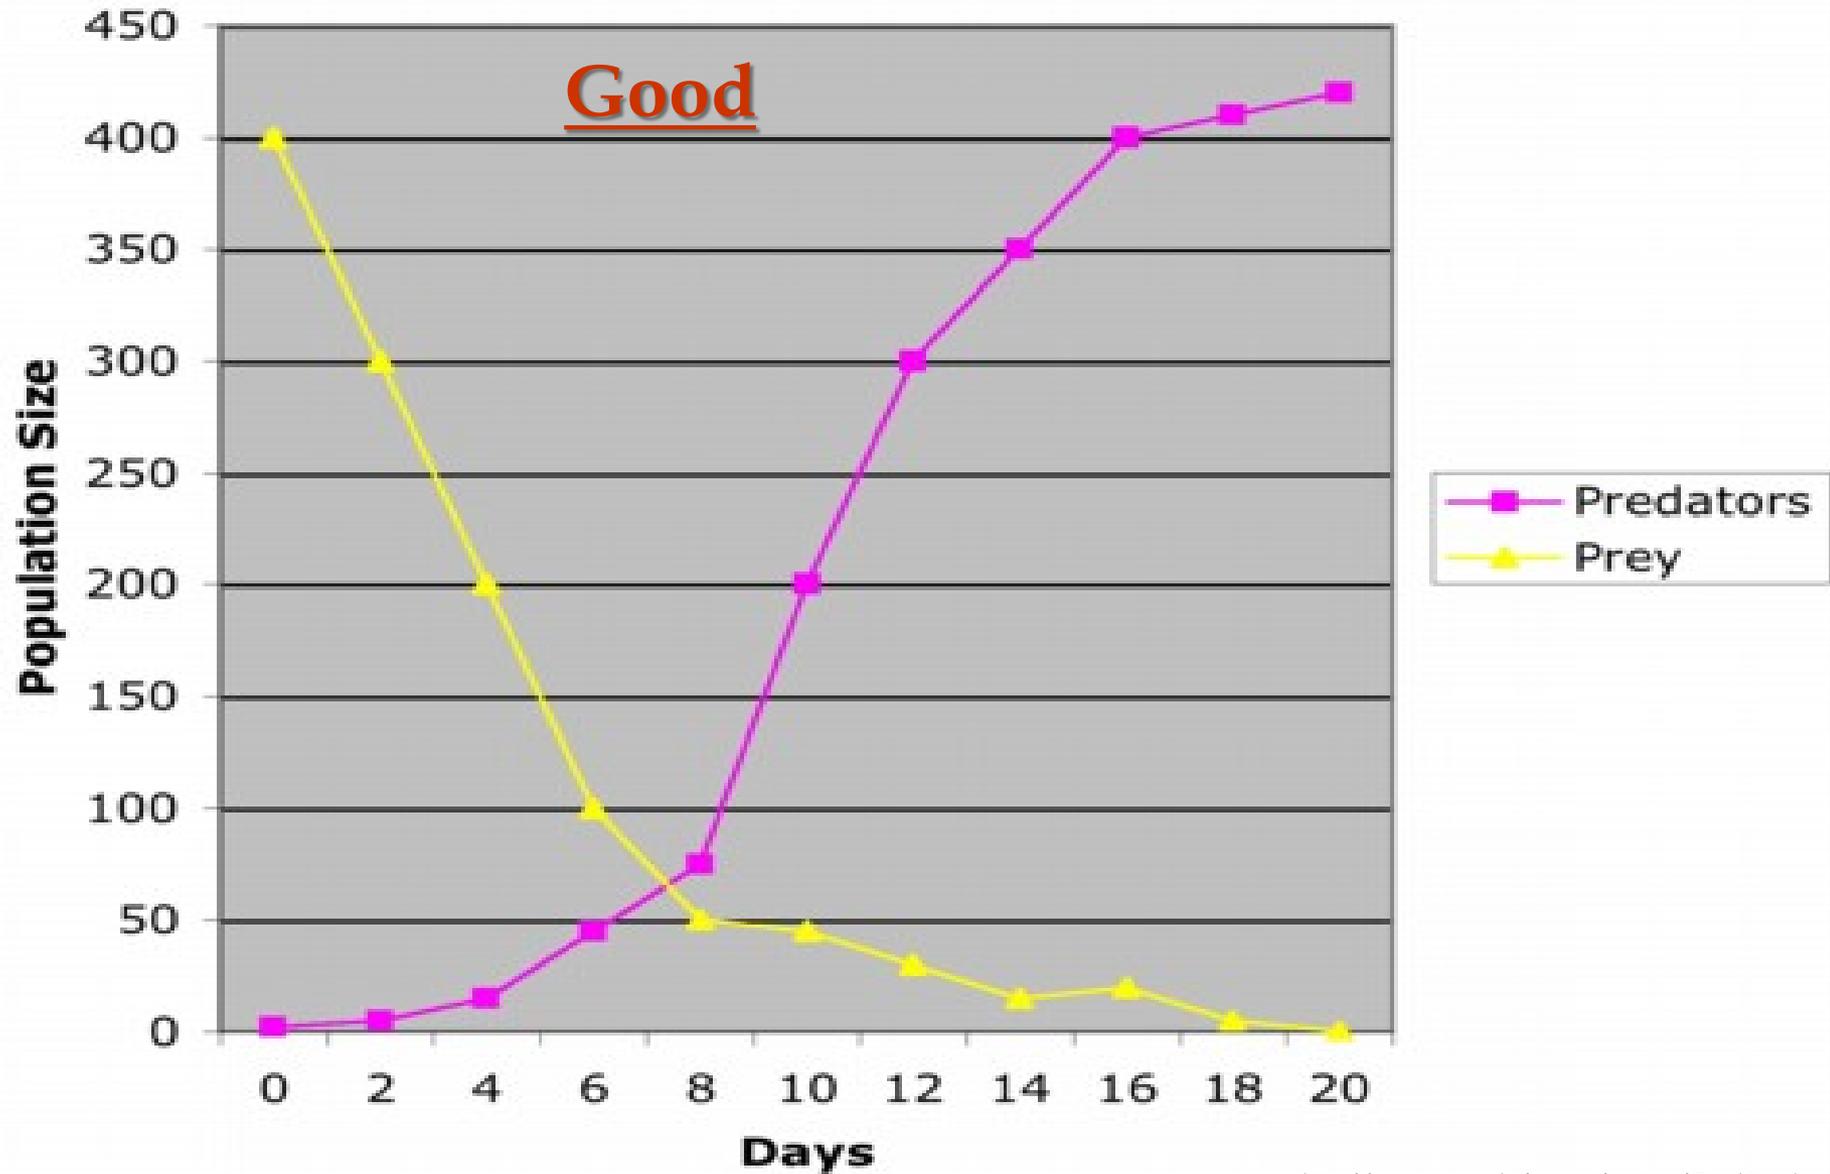

- ▣ Images must already exist
  - beware of copyright issues
  - can be resized, rotated
  - high quality images
  
- ▣ Always acknowledge your sources
  
- ▣ Office 2010:
  - ▣ click: Insert → Picture

# Graphs

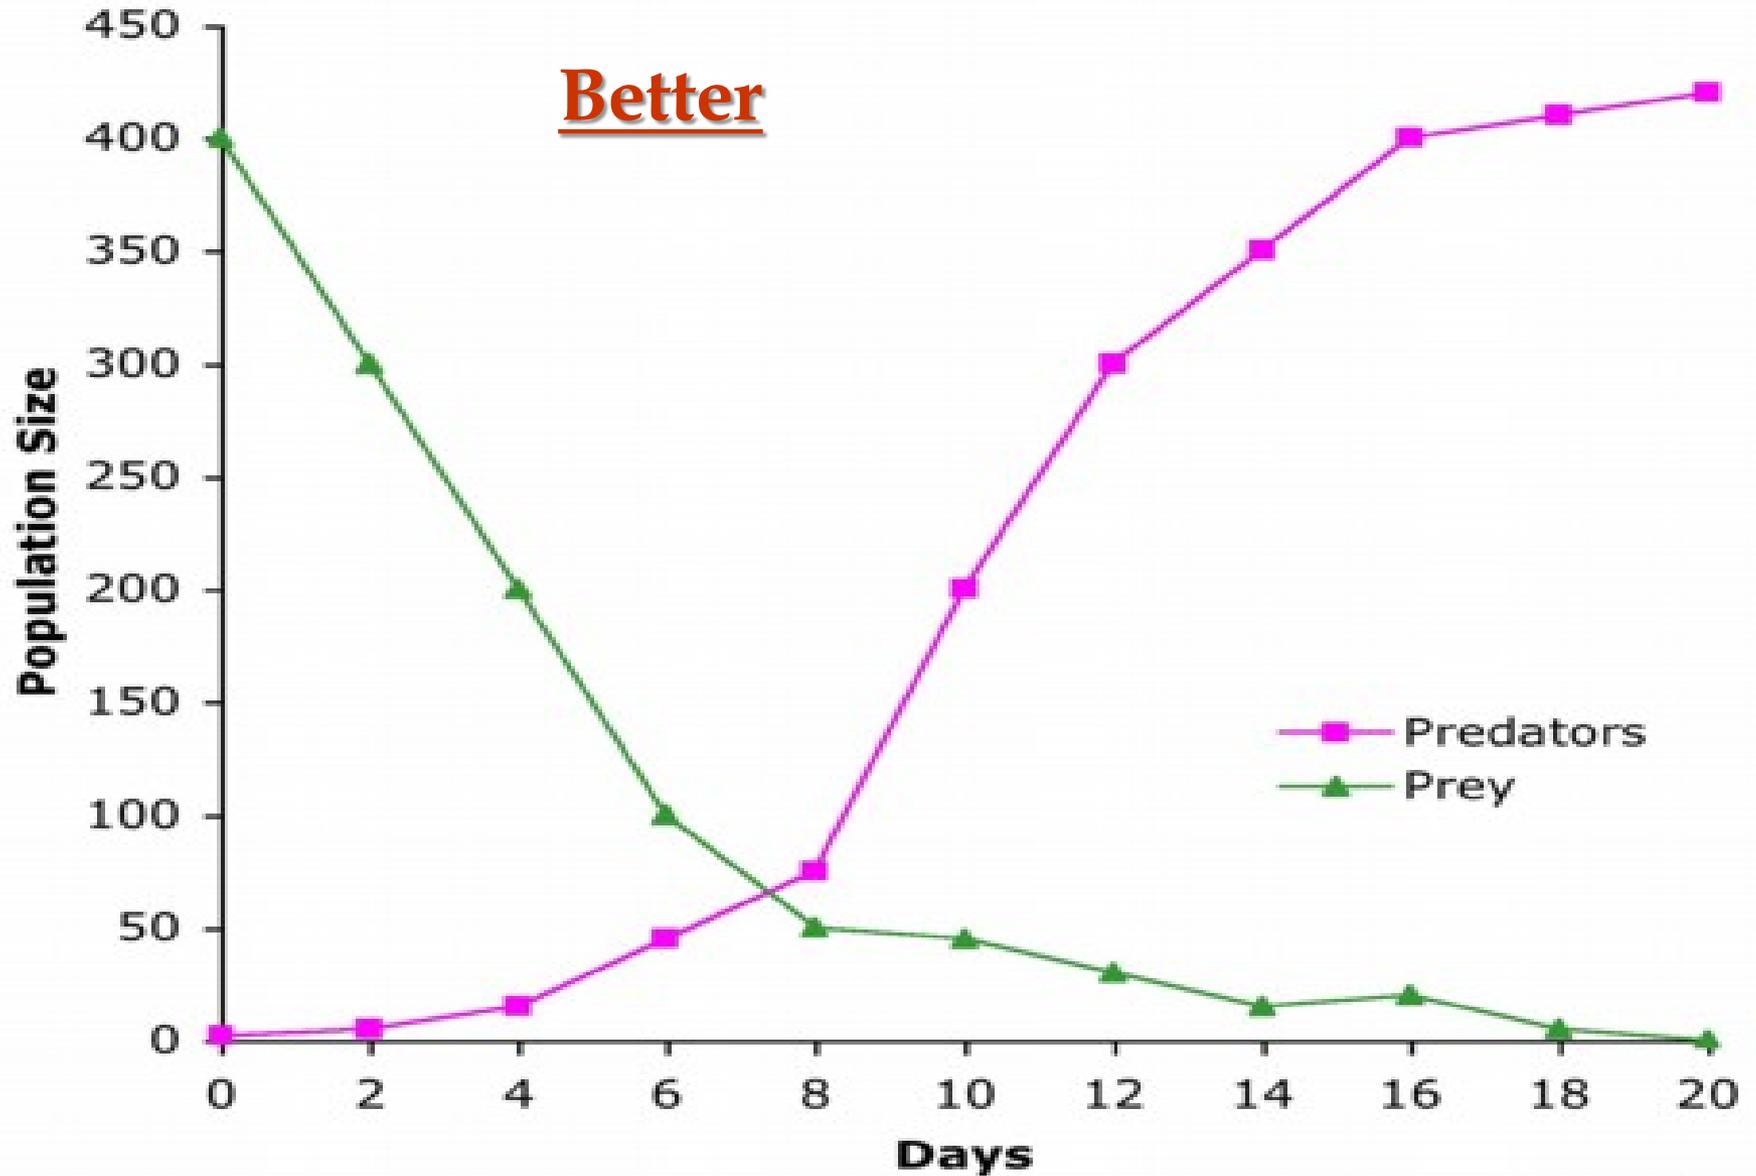

- ▣ Focus on your data
  - keep graphs clean and simple
- ▣ Being exact and specific has its place
  - but it's better to get the message across
- ▣ No distractions
  - your message will come through loud and clear

# Population Sizes Through Time

# Population Sizes Through Time

Better

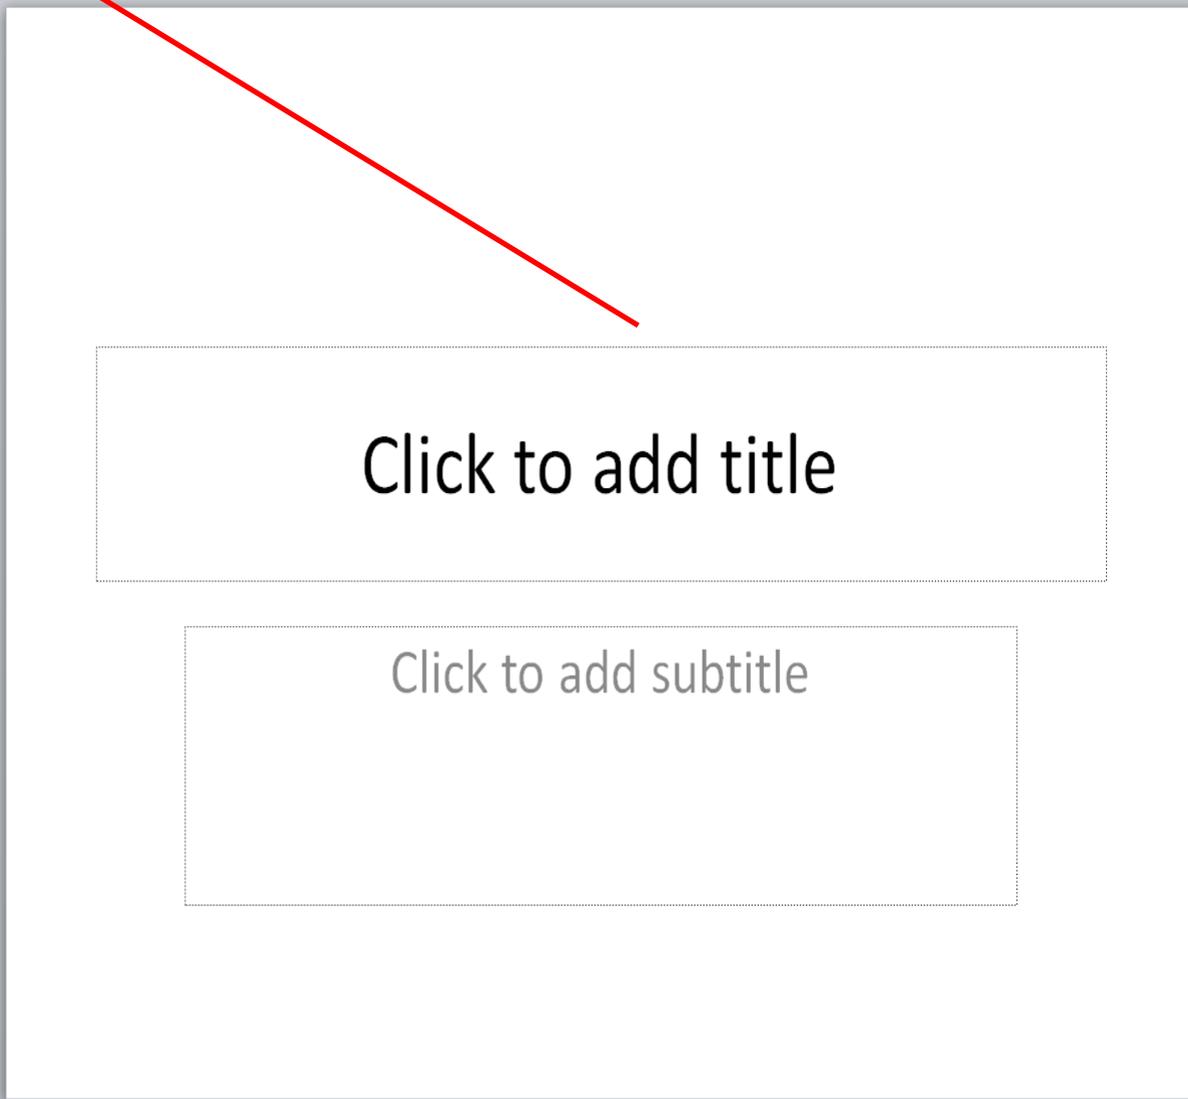

# Themes

- ▣ Every slide uses the theme
- ▣ Do:
  - ▣ keep it simple
  - ▣ use native PPT themes
- ▣ Don't:
  - ▣ use a theme that is distracting
- ▣ Office 2010:
  - ▣ click: Design → Themes
  - ▣ select non-distracting theme

# Themes (cont.)

- ▣ So, is this a distracting background?

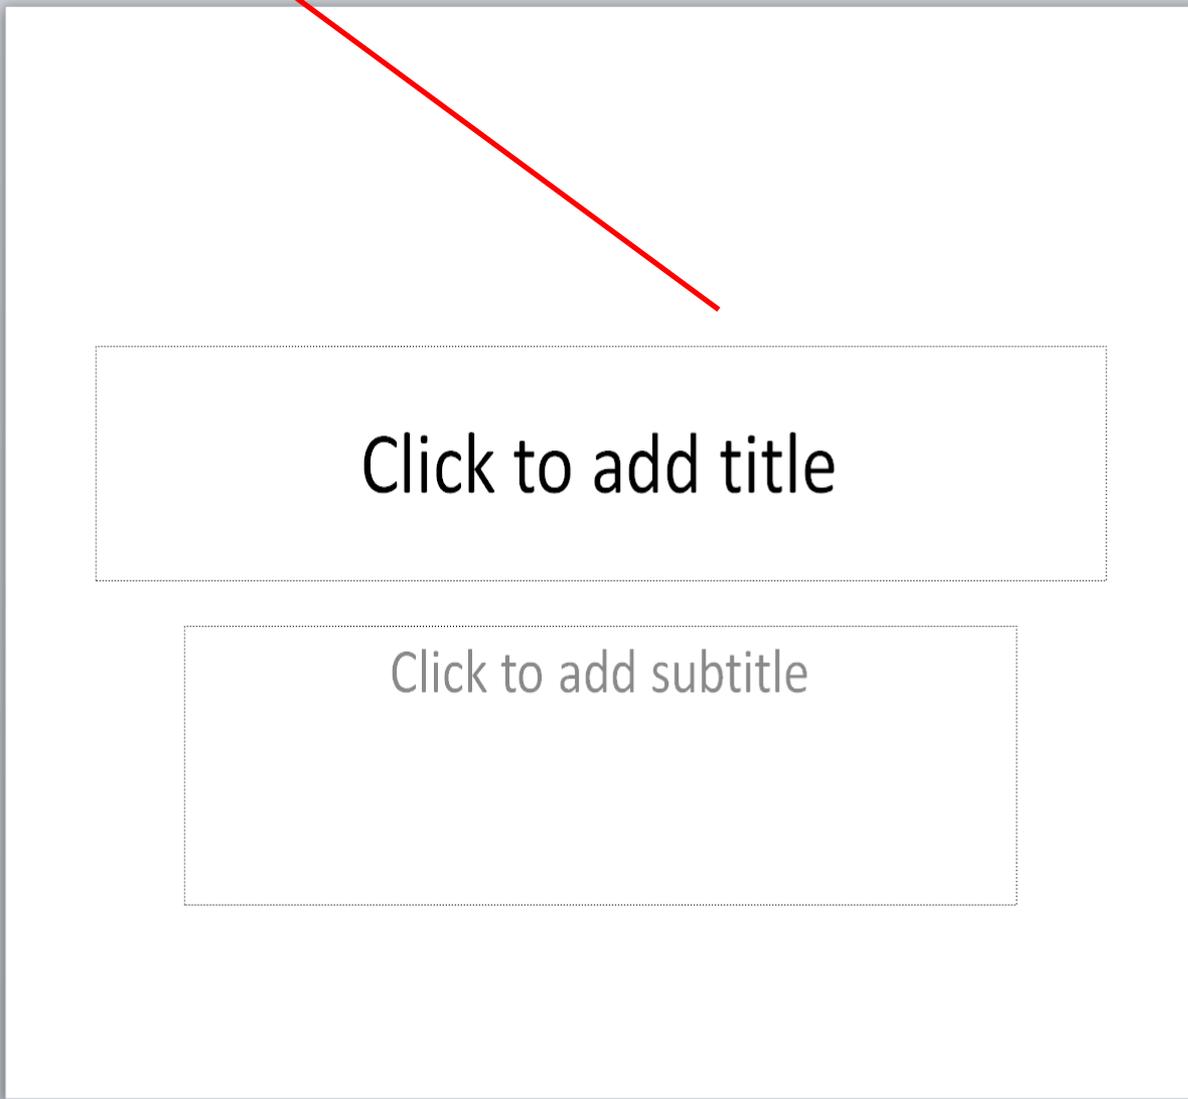

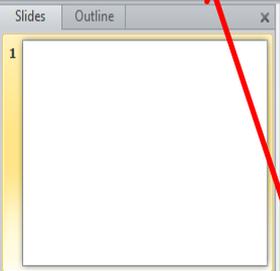

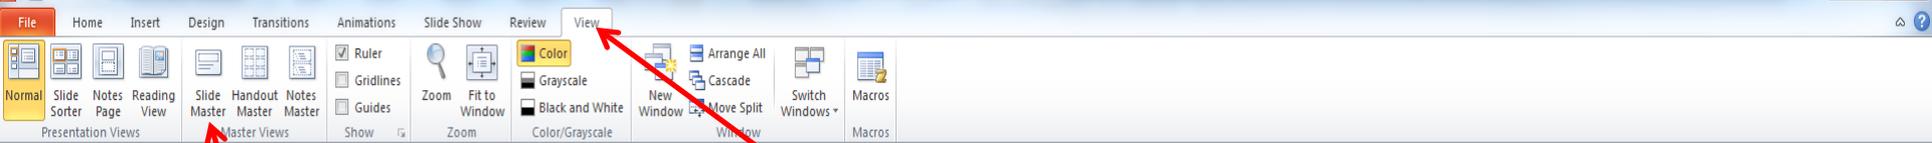

# Themes (cont.)

- ▣ How about this?

# Master Slide

- ▣ Embedded images on each slide
  - Office 2010
    - ▣ Click: View → Slide Master

Click to add notes

# Backgrounds

- ▣ Only one slide uses the background
- ▣ Do:
  - ▣ keep it simple
  - ▣ use native PPT backgrounds
- ▣ Don't:
  - ▣ use a photo

# Backgrounds (cont.)

- ▣ Avoid:
  - burst images

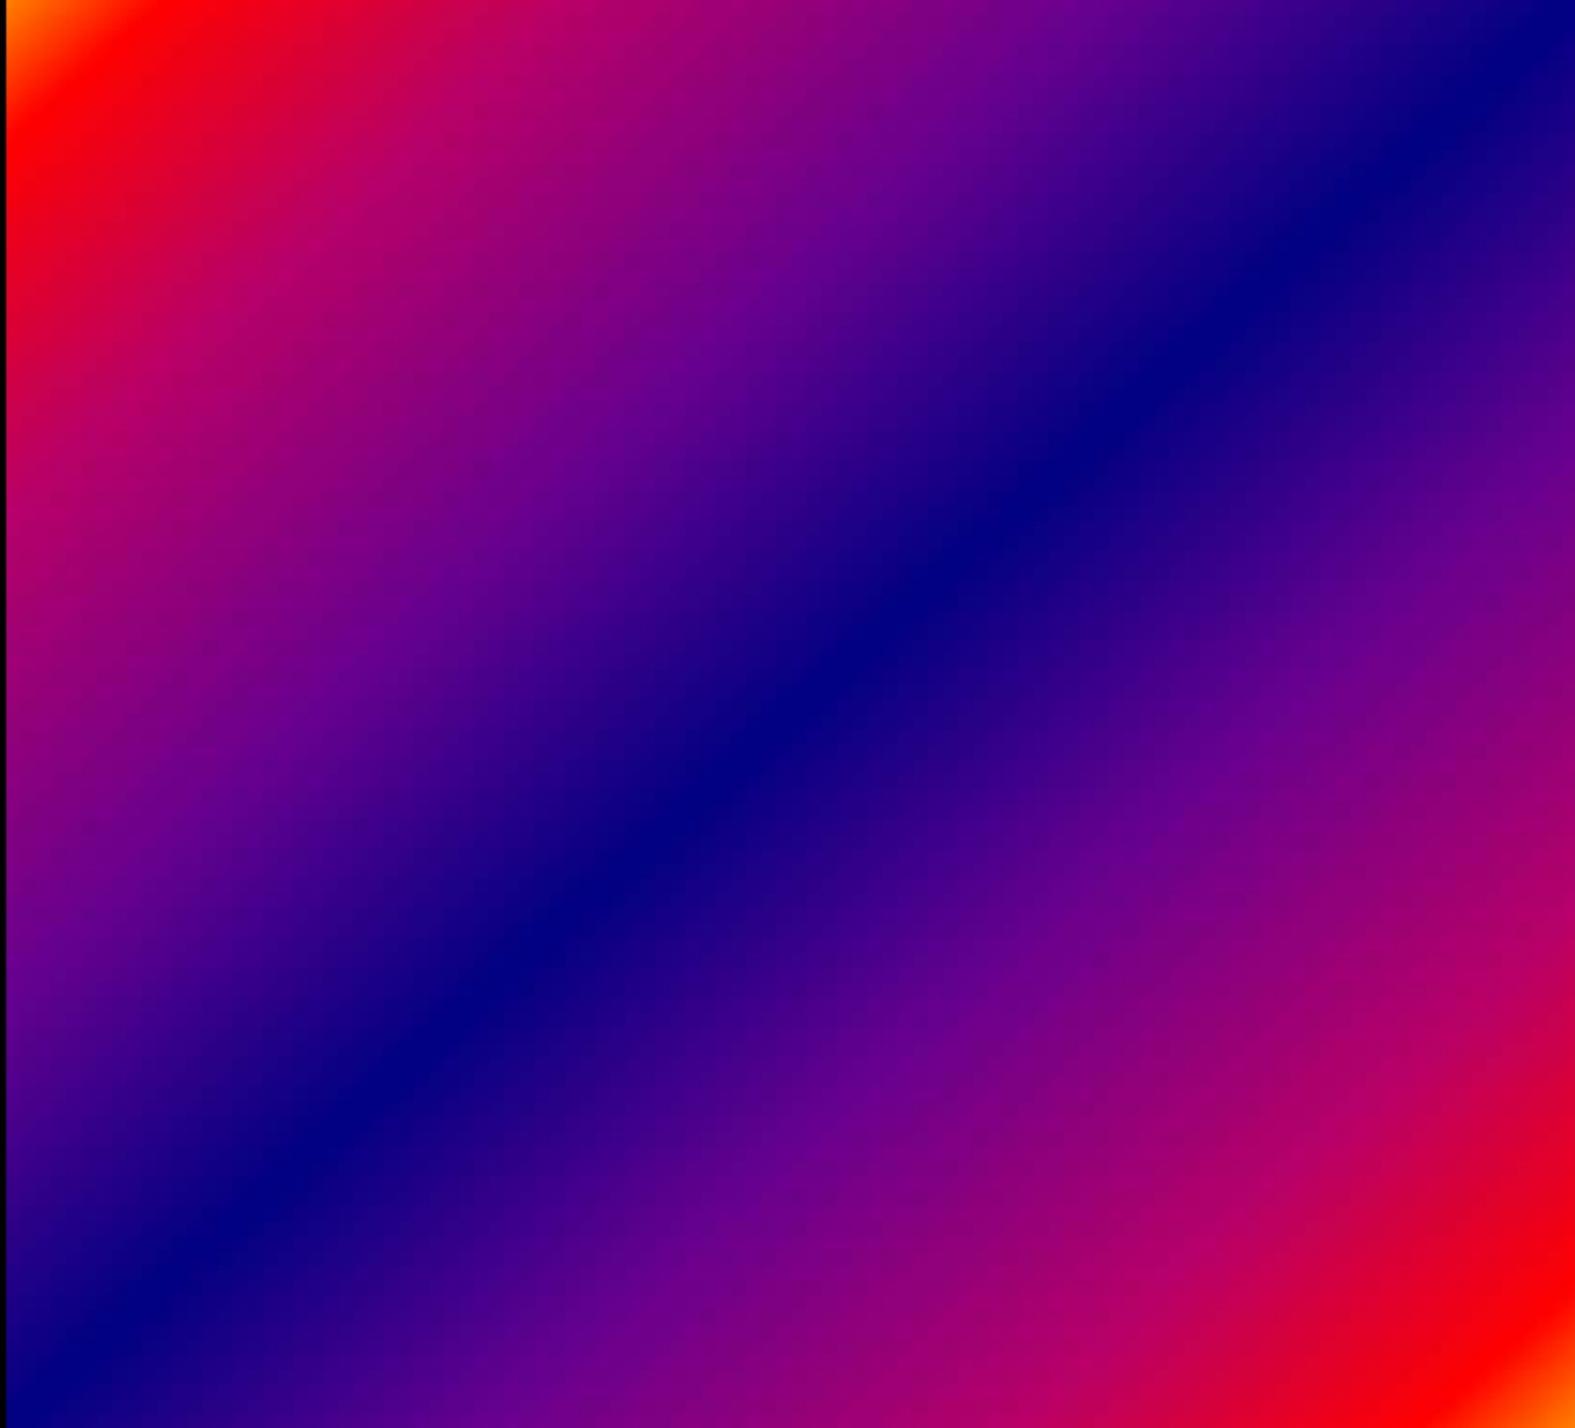

# Backgrounds (cont.)

- ▣ Avoid:
  - burst images
  - strongly mottled images

# Backgrounds (cont.)

- ▣ Avoid:
  - burst images
  - strongly mottled images
  - wild colors

# Backgrounds (cont.)

- ▣ Avoid:
  - burst images
  - strongly mottled images
  - wild colors
- ▣ Remember: simple can be striking!

# Effective Slides

- ▣ Slides should be self-explanatory
  - remove all non-essential information
  - use verbal explanations to fill in details
  
- ▣ Attract visual attention
  - use graphics, but sparingly

# Effective Slides (cont.)

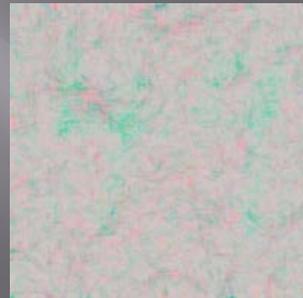

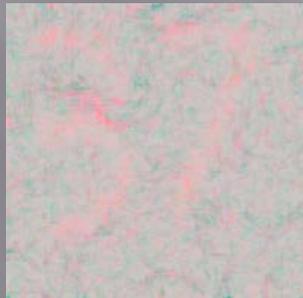

- ▣ Consider viewer impact
  - make it easy to read
  - make it easy to understand
  - people only have a few minutes per slide
- ▣ Keep it short, simple, and to the point

# Effective Slides (cont.)

- ▣ Pick one font and stick to it
  - use larger or bold font for emphasis
- ▣ Use bullet points rather than paragraphs

# Effective Slides (cont.)

- ▣ Avoid red/green combinations
  - red/green color blindness is common

- ▣ Biggest mistake: too much text
  - the most effective slides provide minimal text

# Effective Slides (cont.)

- ▣ A presentation is not
  - a research paper copied to a bunch of slides
    - ▣ avoid visual chaos
    - ▣ avoid shadowed text...
      - ... unless it actually enhances the presentation
    - ▣ make text easy to read

# Common Mistakes

- ▣ Too much text
  - use bullet points
- ▣ Reading from your slide
  - trust the technology
  - don't insult your audience
- ▣ Irritating animation
  - simple is better

# Simple Animation

- ▣ First, place the text or image
  - put things where you want them
  
- ▣ Office 2010
  - ▣ Click: Animations → Highlight → Animation
    - highlight
    - add effect
    - choose order

Put stuff where  
you want it, then  
animate it

# Dual Projectors

- ▣ Special considerations
    - when in doubt, plan for dual projectors
    - be aware of your audience
    - pointers don't work
  - ▣ build animation into your presentation
    - arrows
    - circles
- 

# Good Stuff to Remember

- ▣ Never:
  - use a laser pointer
  - jiggle the mouse
  - look bored, nervous, or scared
  - talk down to the audience
  - turn your back to the audience
  - give a presentation without rehearsing it

# More Good Stuff

- ▣ Never:
  - use capital letters incorrectly
    - ▣ I Don't Ever Want To See Text Looking Like This
  - use the word “utilize”
  - try to memorize your presentation
  - gloss over a slide... it's there for a reason
    - ▣ “... and here are my results!”
  - sigh so loudly that you can be heard
    - ▣ My Cousin Vinny videos

# Even More Good Stuff

## ▣ Always:

- have a bottle of water
- use the restroom beforehand
- thank the person who introduces you
- introduce yourself to the audience

## ▣ Avoid:

- turning your head so far as to induce mic fade
- animated advertising links

# Questions?
