

## About the Pharos Print app

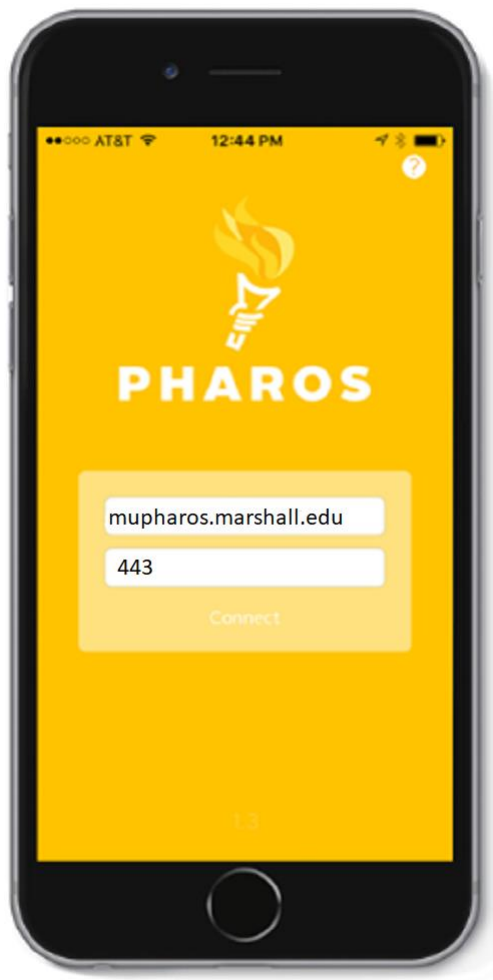

The Pharos Print app allows you to easily submit documents from your iOS or Android device to a Pharos secure print queue. To use this app, a Pharos secure print solution must be in place within your organization.

### Requirements

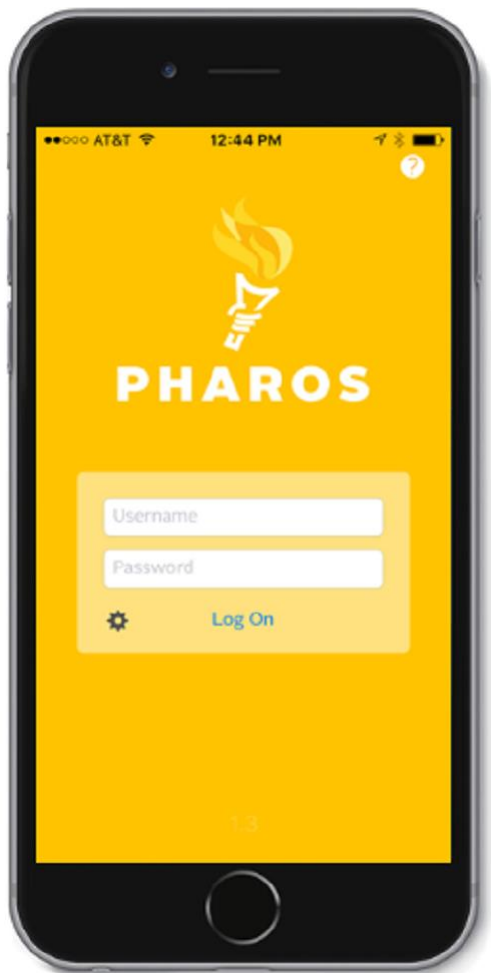

You will need a mobile device running either Apple iOS 13.0 or later, or Android OS 6.0 or later. On both devices, you can submit documents to print by using the Open In and Share (iOS) and Open (Android) command.

### Getting started is easy

1. Download the Pharos Print app from the Apple app store (for iOS devices) or the Google Play app store (for Android devices).
2. Start the Pharos Print app.
3. Enter the server address and port number provided by your IT administrator.

4. Press Connect. The Pharos Print app will connect to the Pharos server and display a log on screen.

5. Enter your username and password, and then press Log On. You're now ready to begin using the app.

## Supported files

The Pharos Print app supports the following file formats:

- Microsoft Office® documents
- Microsoft Outlook® files
- PDF files
- Images (JPG, GIF, PNG, BMP)
- Text files (CSV, RTF & TXT)
- OpenOffice documents
