

Instructions for formatting an 8-page Program Booklet

The first page contains the front and back page of the booklet and is printed outside the fold which is why the front page is on the right side of the sheet

As we have front-back printed pages stacked over each other during formatting page 6 comes after page one

The next sheet of paper has the second page on the outer fold on the right side

This flip side of this sheet becomes the middle page where the staples will be placed
