

Service Learning/Clinical Experience

Students must record forty (40) hours of student contact as part of their clinical teaching responsibilities associated with the program of studies in music education (EDF 200). Students may earn up to fifteen (15) of these hours through documented service learning and/or clinical experience in an activity that provides educational services to improve upon the education given to children [k-12]. These activities must be completed in a school, or under the auspices of a public agency. Hours completed in activities throughout the last year are acceptable. Two types of documentation are necessary: 1) **Documentation** of service learning (see below) and 2) **Reflection** in the form of a two-page, single-spaced narrative describing the experience, lessons learned, consideration of changes to improve the experience and connect to a desire to become a teacher.

Documentation of Service Learning

Name of Student: _____ MU ID Number _____
