The Memorial Student Center shall remain occupied and operational throughout construction. The selected Firm shall evaluate all known and reasonably discoverable conditions associated with the existing roof systems and related building envelope components and shall incorporate into the design those improvements necessary to support a complete, coordinated, code-compliant, and functional roof replacement project.

The selected Firm shall incorporate into the design appropriate phasing, temporary weather protection, occupant protection, operational continuity measures, access requirements, and hazardous material remediation coordination necessary to maintain safe and functional operation of the Memorial Student Center throughout construction. The selected Firm shall maintain regular communication and coordination with the University throughout planning, design, construction documentation, Construction Phase Services, Project Closeout, and Final Completion.
